Changing Concepts of the Nervous System Nov 13 2019
Changing Concepts of the Nervous System, presents the proceedings of the First Institute of Neurological Sciences Symposium in Neurobiology, held at the University of Pennsylvania in October 1980. The book is divided into four parts consisting of mini symposia on different aspects of the neurosciences. The first mini symposia discuss the anatomical, physiological, developmental, and behavioral plasticity of the nervous system. The second mini symposia cover the changing concepts of the central visual system. The idea of the biological basis of the concept of motivation and its behavioral manifestations from both theoretical and experimental aspects is examined in the third mini symposia. The final mini symposia tackle the four aspects of studies on memory: amnesia (consolidation and retrieval), the role of catecholamines, the role of proteins, and the role of peptides. Anatomists, neurobiologists, neuroscientists, and students and researchers in the field of neuroscience will find the book invaluable.

Darwinian Hedonism and the Epidemic of Unhealthy Behavior Jan 28 2021 Provides a new approach to psychological hedonism and applies it to the growing global epidemic of unhealthy behavior.

***Advances in Industrial Design* Jul 14 2022** This book addresses current research trends and practice in industrial design. Going beyond the traditional design focus, it explores a range of recent and emerging aspects concerning service design, human-computer interaction and user experience design, sustainable design, virtual & augmented reality, as

well as inclusive/universal design, and design for all. A further focus is on apparel and fashion design: here, innovations, developments and challenges in the textile industry, including applications of material engineering, are taken into consideration. Papers on pleasurable and affective design, including studies on emotional user experience, emotional interaction design and topics related to social networks make up a major portion of the contributions included in this book, which is based on five AHFE 2020 international conferences (the AHFE 2020 Virtual Conference on Design for Inclusion, the AHFE 2020 Virtual Conference on Interdisciplinary Practice in Industrial Design, the AHFE 2020 Virtual Conference on Affective and Pleasurable Design, the AHFE 2020 Virtual Conference on Kansei Engineering, and the AHFE 2020 Virtual Conference on Human Factors for Apparel and Textile Engineering) held on July 16-20, 2020. Thanks to its multidisciplinary approach, it provides graduate students, researchers and professionals in engineering, architecture, computer and materials science with extensive information on research trends, innovative methods and best practices, and a unique bridge fostering collaborations between experts from different disciplines and sectors.

The Oxford Handbook of Philosophy of Emotion Aug 23 2020
This Handbook presents thirty-one state-of-the-art contributions from the most notable writers on philosophy of emotion today. Anyone working on the nature of emotion, its history, or its relation to reason, self, value, or art, whether at the level of research or advanced study, will find the book an unrivalled resource and a fascinating read.

Advances in Affective and Pleasurable Design Aug 15 2022
This book discusses the latest advances in affective and pleasurable design. Further, it reports on important theoretical and practical issues, covering a wealth of topics including aesthetics in product and system design, design-

driven innovation, affective computing, evaluation tools for emotion, Kansei engineering for products and services, and many more. Based on the AHFE 2018 International Conference on Affective and Pleasurable Design, held on July 21-25, 2018, in Orlando, Florida, USA, the book provides a timely survey and inspiring guide for all researchers and professionals involved in design, e.g. industrial designers, emotion designers, ethnographers, human-computer interaction researchers, human factors engineers, interaction designers, mobile product designers, and vehicle system designers.

Cinematic Emotion in Horror Films and Thrillers Mar 10 2022 Hanich looks at fear at the movies - its aesthetics, its experience and its pleasures--in this thought-provoking study. Looking at over 150 different films including *Seven*, *Rosemary's Baby*, and *Silence of the Lambs*, Hanich attempts to answer the paradox of why we enjoy films that thrill us, that scare us, that threaten us, that shock us -affects that we otherwise desperately wish to avoid.

How Do Emotions and Feelings Regulate Physical Activity? Jul 22 2020 Up to date the scientific discussion about how frequency and regularity of physical activity can be increased is dominated by social-cognitive models. However, increasing evidence suggests that emotions and feelings have greater influence on physical activity than originally assumed (Rhodes, Fiala, & Conner, 2009). Generally speaking, humans possess an evaluative system with a basic action tendency to approach pleasurable events and to avoid aversive ones (Cacioppo & Berntson, 1999). Evaluative responses to a behavior and associated emotional states may influence a decision regarding whether or not to repeat being physically active. Generally, behavior associated with positive evaluations has a higher probability of being repeated than behaviors without such an association. On the contrary, an

association with negative evaluations tends to decrease the probability of repeating to be physically active. Hence, evaluative responses to physical activity or the related situation can be an important aspect in the process of physical activity maintenance (McAuley et al., 2007). Several social-cognitive models of behavior change and maintenance were recently extended to take the influence of affective responses into account, in a way that variables already included in the models (e.g. outcome expectancies or attitudes) were more clearly articulated into their cognitive and affective components. For example, with regard to Social Cognitive Theory, Gellert, Ziegelmann and Schwarzer (2012) proposed to distinguish between affective and health-related outcome expectancies, and in the Theory of Planned Behavior, researchers suggested to differentiate between cognitive and affective attitudes (Lawton, Conner, & McEachan, 2009). The results of these and other studies suggest that affective components make a unique contribution to the explanation of the physical activity behavior (Brand, 2006). Other examples come from social cognition research, where it was shown that automatic evaluative responses are part of our everyday life and that they decisively influence health behavior (Hofmann, Friese, & Wiers, 2008). Accordingly, there is evidence that people who exercise regularly hold more positive automatic evaluations with exercise than non-exercisers (Bluemke, Brand, Schweizer, & Kahlert, 2010). Although significant progress has been made in showing that evaluative responses to physical activity and associated emotional states are important predictors of physical activity underlying psychological processes are far from being fully understood. Some important issues still remain to be resolved. Which role play affective states compared to concrete emotions when influencing physical activity? How do affective states and

emotions interact with cognitive variables such as intentions? Are evaluative processes before, during or after physical activity important to predict future physical activity? Do negative and positive evaluations interact antagonistically or rather synergistically when physical activity as a new behavior shall be adopted? Future research will help us to resolve these and a lot of other so far unresolved issues.

Physiology of the Nervous System Oct 13 2019

Alcohol and Pleasure Mar 30 2021 There is no simple threshold between the experience of drinking and the pleasure it can bring on the one hand and the pain and suffering caused by alcohol abuse on the other. But if we are to understand the role of alcohol in society, then at the very least we need to acknowledge the pleasure as well as the pain. Alcohol and Pleasure aims to bring together existing knowledge on the role of pleasure in drinking and determine whether the concept is useful for scientific understanding and policy consideration.

Affective Neuroscience Jan 08 2022 This comprehensive and exceptionally readable text summarizes up-to-date information about the fundamental brain sources of emotional tendencies in humans and other animals.

An Introduction to neurology Dec 27 2020

Games are Lit Feb 09 2022 "The past two decades have seen a steady decline in reading motivation, performance, and enjoyment in adolescent learners as they progress through secondary school. This has been attributed to current majoritarian tendencies in English Language Arts courses that honour archaic notions of literacy and literary text, and fail to instill a love of reading and lifelong reading habits in young pupils. Exploring an alternative to these common approaches, this thesis research seeks to delineate the ways in which narrative-based video games can be read as complex, multimodal texts to foster affective engagement and

opportunities for pleasurable reading. Meeting weekly over the course of a two month-long period at a youth center in Montréal, Canada, study participants played through Persona 5 (2016): a video game largely centered upon complex storylines, narrative-based technique, and themes commonly found in young-adult literature. With an affect-based perspective and relational materialist methodological approach employed, data were examined according to the unit of analysis of felt focal moments. These methods captured the ways in which meaning-making with new media was an ever-evolving, unpredictable, and embodied process allowing collaborative and felt literacy events to come into being. Findings were utilized to inform an effective and affective pedagogy serving as a tool for English Language Arts educators to better harness the tremendous potential for engaging adolescent students with narrative-based video games. This thesis study addresses a gap in existing research and sets a precedent for future studies to expand knowledge of meaning-making and engagement with new media texts in educational settings"--

The First Idea Apr 30 2021 In the childhood of every human being and at the dawn of human history there is an amazing and, until now, unexplained leap from simple genetically programmed behavior to language, symbolic thinking, and culture. In The First Idea, Stanley Greenspan and Stuart Shanker explore this missing link and offer brilliant new insights into two longstanding questions: how human beings first create symbols and how these abilities evolved and were transmitted across generations over millions of years. From fascinating research into the intelligence of both human infants and apes, they identify certain cultural practices that are vitally important if we are to have stable and reflective future societies.

Advances in Affective and Pleasurable Design Feb 21 2023

This book discusses the latest advances in affective and pleasurable design. Further, it reports on important theoretical and practical issues, covering a wealth of topics including aesthetics in product and system design, design-driven innovation, affective computing, evaluation tools for emotion, Kansei engineering for products and services, and many more. Based on the AHFE 2018 International Conference on Affective and Pleasurable Design, held on July 21-25, 2018, in Orlando, Florida, USA, the book provides a timely survey and inspiring guide for all researchers and professionals involved in design, e.g. industrial designers, emotion designers, ethnographers, human-computer interaction researchers, human factors engineers, interaction designers, mobile product designers, and vehicle system designers.

Psychocinematics Jun 20 2020 Largely through trial and error, filmmakers have developed engaging techniques that capture our sensations, thoughts, and feelings. Philosophers and film theorists have thought deeply about the nature and impact of these techniques, yet few scientists have delved into empirical analyses of our movie experience-or what Arthur P. Shimamura has coined "psychocinematics." This edited volume introduces this exciting field by bringing together film theorists, philosophers, psychologists, and neuroscientists to consider the viability of a scientific approach to our movie experience.

Advances in Affective and Pleasurable Design Jan 20 2023 This book discusses the latest advances in affective and pleasurable design. It reports on important theoretical and practical issues, covering a wealth of topics, including aesthetics in product and system design, design-driven innovation, affective computing, evaluation tools for emotion, Kansei engineering for products and services, and many more. This timely survey addresses experts and industry

practitioners with different backgrounds, such as industrial designers, emotion designers, ethnographers, human-computer interaction researchers, human factors engineers, interaction designers, mobile product designers, and vehicle system designers. Based on the AHFE 2016 International Conference on Affective and Pleasurable Design, held on July 27-31, 2016, in Walt Disney World®, Florida, USA, the book represents an inspiring guide for all researchers and professionals in the field of design.

Design for Emotion May 12 2022 "Design for Emotion' introduces you to the why, what, when, where and how of designing emotional experiences. Learn how to increase user engagement, loyalty and satisfaction by incorporating emotion and personality into your designs. This isn't just another book on design theory--it's exceptionally practical. The applications of emotion in design are explored through extensive real world examples. This book will help you improve the design of products, interfaces and applications while enhancing learning and understanding. The book introduces the A.C.T. Model (Attract/Converse/Transact), a framework for creating designs that intentionally trigger emotional responses."--Publisher description.

Our Inner World Jan 16 2020 "Exuding emboldening intellectual doughtiness, Ahles lucidly, and absorbingly, plumbs the challenging depths of psychodynamics and psychotherapy." -- Metaphysiology Online Book Review

Advances in Industrial Design Apr 11 2022 This book addresses current research trends and practice in industrial design. Going beyond the traditional design focus, it explores a range of recent and emerging aspects concerning service design, human-computer interaction and user experience design, sustainable design, virtual and augmented reality, as well as inclusive/universal design, and design for all. A further focus is on apparel and fashion design: here,

innovations, developments and challenges in the textile industry, including applications of material engineering, are taken into consideration. Papers on pleasurable and affective design, covering studies on emotional user experience, emotional interaction design and topics related to social networks, are also included. Based on the AHFE 2021 International Conferences on Design for Inclusion, Interdisciplinary Practice in Industrial Design, Affective and Pleasurable Design, Kansei Engineering, and Human Factors for Apparel and Textile Engineering, held virtually on 25-29 July 2021, from USA, this book provides, researchers and professionals in engineering, design, human factors and ergonomics, human computer interaction and materials science with extensive information on research trends, innovative methods and best practices, and is expected to foster collaborations between experts from different disciplines and sectors.

***Audience Effect* Sep 23 2020 Shows how the interactive, confrontational practice of courtly arts shaped imperial thought in the Middle Ages**

A Textbook of Environmental Chemistry and Pollution Control May 20 2020 The Progress and Prosperity of any country mainly depend upon the quality of its human resource, which in turn, depends upon the quality of its educational system. Higher and technical education, being at the apex of the pyramid of education, play a major role in the overall development of any country. One of the major drawbacks of the higher and technical education in our country, is the palpable gap between the world of learning and the world of work.

Emotion, Psychopathology, and Psychotherapy Feb 26 2021 Emotion: Theory, Research, and Experience, Volume 5: Emotion, Psychopathology, and Psychotherapy is concerned with the formulation of models of emotion psychopathology

and psychotherapy. The book focuses on the dysregulation of emotion, methods for changing emotion and the experience of emotion. The papers contained in the volume are grouped into theoretical works that link emotions to psychopathology and psychotherapy based on concepts derived from evolutionary biology; theoretical works that utilizes psychoanalysis in understanding emotions; and the transformation of cognitive constructions through psychotherapy. Psychologists, psychiatrists, psychoanalysts, sociobiologists, and students in the allied fields will find the book a good source of insight.

Outlines of Psychology Dec 15 2019

Affective and Pleasurable Design Oct 17 2022 Affective and Pleasurable Design Proceedings of the 13th International Conference on Applied Human Factors and Ergonomics (AHFE 2022), July 24-28, 2022, New York, USA

The Aesthetics of Emotion Oct 25 2020 Argues that relations between mind and body are analogous to those between subject matter and style in art.

Emotional Design Aug 03 2021 Why attractive things work better and other crucial insights into human-centered design Emotions are inseparable from how we humans think, choose, and act. In Emotional Design, cognitive scientist Don Norman shows how the principles of human psychology apply to the invention and design of new technologies and products. In The Design of Everyday Things, Norman made the definitive case for human-centered design, showing that good design demanded that the user's must take precedence over a designer's aesthetic if anything, from light switches to airplanes, was going to work as the user needed. In this book, he takes his thinking several steps farther, showing that successful design must incorporate not just what users need, but must address our minds by attending to our visceral reactions, to our behavioral choices, and to the stories we

want the things in our lives to tell others about ourselves. Good human-centered design isn't just about making effective tools that are straightforward to use; it's about making affective tools that mesh well with our emotions and help us express our identities and support our social lives. From roller coasters to robots, sports cars to smart phones, attractive things work better. Whether designer or consumer, user or inventor, this book is the definitive guide to making Norman's insights work for you.

Music and the Functions of the Brain: Arousal, Emotions, and Pleasure Dec 07 2021 Music impinges upon the body and the brain. As such, it has significant inductive power which relies both on innate dispositions and acquired mechanisms and competencies. The processes are partly autonomous and partly deliberate, and interrelations between several levels of processing are becoming clearer with accumulating new evidence. For instance, recent developments in neuroimaging techniques, have broadened the field by encompassing the study of cortical and subcortical processing of the music. The domain of musical emotions is a typical example with a major focus on the pleasure that can be derived from listening to music. Pleasure, however, is not the only emotion to be induced and the mechanisms behind its elicitation are far from understood. There are also mechanisms related to arousal and activation that are both less differentiated and at the same time more complex than the assumed mechanisms that trigger basic emotions. It is imperative, therefore, to investigate what pleasurable and mood-modifying effects music can have on human beings in real-time listening situations. This e-book is an attempt to answer these questions. Revolving around the specificity of music experience in terms of perception, emotional reactions, and aesthetic assessment, it presents new hypotheses, theoretical claims as well as new empirical data which contribute to a

better understanding of the functions of the brain as related to musical experience.

The American Journal of Psychology Apr 18 2020

Advances in Affective and Pleasurable Design Dec 19 2022

This volume discusses pleasurable design – a part of the traditional usability design and evaluation methodologies. The book emphasizes the importance of designing products and services to maximize user satisfaction. By combining this with traditional usability methods it increases the appeal of products and use of services. This book focuses on a positive emotional approach in product, service, and system design and emphasizes aesthetics and enjoyment in user experience and provides dissemination and exchange of scientific information on the theoretical and practical areas of affective and pleasurable design for research experts and industry practitioners from multidisciplinary backgrounds, including industrial designers, emotion designer, ethnographers, human-computer interaction researchers, human factors engineers, interaction designers, mobile product designers, and vehicle system designers.

The Aesthetics of Emotion Nov 25 2020 Gerald C. Cupchik builds a bridge between science and the humanities, arguing that interactions between mind and body in everyday life are analogous to relations between subject matter and style in art. According to emotional phase theory, emotional reactions emerge in a 'perfect storm' whereby meaningful situations evoke bodily memories that unconsciously shape and unify the experience. Similarly, in expressionist or impressionist painting, an evocative visual style can spontaneously colour the experience and interpretation of subject matter. Three basic situational themes encompass complementary pairs of primary emotions: attachment (happiness - sadness), assertion (fear - anger), and absorption (interest - disgust). Action episodes, in which a person adapts to challenges or

seeks to realize goals, benefit from energizing bodily responses which focus attention on the situation while providing feedback, in the form of pleasure or pain, regarding success or failure. In high representational paintings, style is transparent, making it easier to fluently identify subject matter.

Developing Healthy Emotions Jun 01 2021 In 1990 Peter Salovey and John (Jack) Mayer described Emotional Intelligence (EQ) as, "the ability to monitor our own and other's emotions, to discriminate among them, and to use this information to guide our thinking and actions." Emotional Intelligence is not diametrical, but in addition to 'conventional' intelligence. It means using your emotions to help you get along with people, solve problems and live a happier and well-balanced life. It combines feelings with knowledge, emotion with intelligence. Both these intelligences are essential for a successful and fulfilling life for ourselves and others within our inner circle. Dr. Daniel Goleman adopted some of Mayer's and Salovey's theory in his book 'Emotional Intelligence.' At first glance, this seems like an oxymoron. It is a common belief that intelligence and emotions are two distinctly separate characteristics, with emotions considered a failing that lead to poor decisions and actions. Not true. Daniel Goleman suggests that intelligence can be applied to successfully use emotions to create a fulfilling and balanced life. Emotion has been defined as "an affective state of consciousness in which joy, sorrow, fear, hate, or the like, is experienced, as distinguished from cognitive and volitional states of consciousness" (Random House Dictionary of the English Language). The word 'affective' means pertaining to feeling or emotion, especially to pleasurable or unpleasurable aspects of a mental process. These definitions suggest that emotion is different from cognition (noesis or knowledge), and volition (purpose or

motivation). Here's a question. How were some of the world's greatest leaders able to motivate tens of thousands of people to risk their lives in battles and conquer the fear of death? By rational reasoning? By intelligent application of math and science? By convincing them of the benefits of possibly dying a gory death? No! They appealed to the emotions. They were masters in managing both their own and other people's emotions. They were emotionally intelligent. What is intelligence? The clearest meaning may be: "intelligence is a set of cognitive abilities which allows us to acquire knowledge, to learn and to solve problems." That's clear enough. But what kind of problems are we referring to? If they're rational and cerebral, that shouldn't be too difficult. But what if the problem arises from emotions [feelings] that have been negatively aroused? This is where emotional intelligence steps in. Emotional Intelligence (EQ) combines intelligence and emotions, using them both to create a sensible balance. It's the ability to understand emotions, and to intellectually and consciously modulate the emotions in any given situation to meet a desired objective that is acceptable to everyone involved. This essentially means being able to 'identify' the predominant feelings you and those with you are experiencing, then use this knowledge to generate an emotion, and then reason with this emotion to achieve the desired objective. It means using your emotions to help you solve problems and live a more effective life. Emotional intelligence without intellectual intelligence, or intelligence without emotional intelligence, is incomplete. Emotional intelligence is not about how to be gracious and refined, or about how to win friends and influence people, though it does help in both. It does not replace job skills, initiative or knowledge; neither is it vital in every aspect of day-to-day activities? But it is crucial in effective leadership and career growth, and in all spheres of interaction with others. It helps

us understand and express our own emotions, discern emotions in others, manage feelings, and use emotions to bring about accommodative (resolving differences to gain agreement) behaviors. This book shares practical methods on how you can generate healthy emotions when you want, and regain your emotional balance and emotional health.

Advances in Affective and Pleasurable Design Sep 16 2022
This book discusses the latest advances in affective and pleasurable design. It reports on important theoretical and practical issues, covering a wealth of topics including aesthetics in product and system design, design-driven innovation, affective computing, evaluation tools for emotion, Kansei engineering for products and services, and many more. This timely survey addresses experts and industry practitioners with different backgrounds, such as industrial designers, emotion designers, ethnographers, human-computer interaction researchers, human factors engineers, interaction designers, mobile product designers, and vehicle system designers. Based on the AHFE 2017 International Conference on Affective and Pleasurable Design, held on July 17-21, 2017, in Los Angeles, California, USA, the book provides an inspiring guide for all researchers and professionals in the field of design.

Pleasures of the Brain Sep 04 2021
Pleasure is fundamental to well-being and the quality of life, but until recently, was barely explored by science. Current research on pleasure has brought about ground-breaking developments on several fronts, and new data on pleasure and the brain have begun to converge from many disparate fields. The time is ripe to present these important findings in a single volume, and so Morten Kringelbach and Kent Berridge have brought together the leading researchers to provides a comprehensive review of our current scientific understanding of pleasure. The authors present their latest neuroscientific research into

pleasure, describing studies on the brain's role in pleasure and reward in animals and humans, including brain mechanisms, neuroimaging data, and psychological analyses, as well as how their findings have been applied to clinical problems, such as depression and other disorders of hedonic well-being. To clarify the differences between their views, the researchers also provide short answers to a set of fundamental questions about pleasure and its relation to the brain. This book is intended to serve as both a starting point for readers new to the field, and as a reference for more experienced graduate students and scientists from fields such as neuroscience, psychology, psychiatry, neurology, and neurosurgery.

Emotional Design Feb 15 2020 The author of *The Design of Everyday Things* links human emotions and perceptions to how we relate to ordinary objects as he explains why attractive things really do work better. 40,000 first printing.

Advances in Affective and Pleasurable Design Nov 18 2022 This book discusses the latest advances in affective and pleasurable design. It reports on important theoretical and practical issues, covering a wealth of topics including aesthetics in product and system design, design-driven innovation, affective computing, evaluation tools for emotion, Kansei engineering for products and services, and many more. Based on papers presented at the AHFE 2019 International Conference on Affective and Pleasurable Design, held on July 24-28, 2019, in Washington DC, USA, the book provides an inspiring guide for all researchers and professionals in the field of design, e.g. industrial designers, emotion designers, ethnographers, human-computer interaction researchers, human factors engineers, interaction designers, mobile product designers, and vehicle system designers.

Addiction Counseling Nov 06 2021 Equips the upcoming

generation of addiction counselors with crucial knowledge to skillfully treat current and future addictions Grounded in leading-edge, evidence-based research, this hands-on text applies a step-by-step approach to addictions counseling. This book encompasses assessment, diagnosis, and treatment planning; case management; and relapse prevention, with an incisive focus on process addictions and co-occurring disorders. The text covers all essential topics as outlined in the gold standard SAMSHA Counselor Training Manual. Included are detailed guidelines on how to write succinct treatment plans and conduct effective client sessions; case studies; role-playing exercises; and clinical applications to assessment and diagnosis, treatment planning, and case management. Counselor Perspectives--interviews with experienced clinicians working with varied populations throughout the country--offer the wisdom of those who have been there. Critical topics unique to the book include the role of neuroscience in addiction treatment, relapse prevention, and advocacy. In addition, the text offers specific chapters on process addictions and co-occurring disorders as well as a separate chapter on multicultural counseling covering gender, racial, ethnic, sexual orientation, age, religion, and disability issues. It is also distinguished by an abundance of downloadable forms and documents, including screening instruments, treatment plan format templates, treatment plan examples, biopsychosocial assessment forms, informed consent forms, confidentiality forms, case management forms, and more. Pedagogical elements to help learners process and apply concepts include key terms, learning activities, discussion questions, recommended readings/resources and chapter summaries. Faculty aides include an instructor's manual with sample syllabi, CACREP mapping tools, test bank, and PowerPoint slides. This essential resource will be valued as a primary textbook for

any course that focuses on addiction counseling and treatment. Purchase includes digital access for use on most mobile devices or computers. Key Features: Describes a variety of etiological models and how they become a means of assessing biopsychosocial risk factors Delivers step-by-step guidelines on how to write concise treatment plans and for conducting effective treatment sessions Devotes a chapter to motivational interviewing to promote willingness to change Includes cutting-edge research pertaining to neuroscience and its applications and evidence-based treatment practices Provides separate chapter on multicultural counseling and substance use disorders among people of diverse races, ethnicities, genders, class, ages, and spirituality Offers real-world insights with "Notes from the Field" feature Facilitates practical application through role play exercises, treatment technique and assessment case examples, biopsychosocial assessment guidelines, how to provide client feedback, and more Includes multiple digital downloadable tools

Camming Oct 05 2021 The first inside look at how sex workers use webcams to make a living The erotic webcam industry, also known as "camming," is a thriving global business. Angela Jones takes readers inside this multi-billion dollar industry, revealing how its workers experience intimacy, community, empowerment—and, as she compellingly argues, pleasure. Drawing on in-depth interviews, survey data, web analytics, and more, Jones highlights not only the dangers, but also the rewards, of working in one of the most taboo corners of the Internet. She provides an inside look at the public and private shows between cam models and their customers, from exotic dancing and pornographic videos, to masturbation shows and erotic chatrooms. A fascinating, much-needed glimpse into the lives of cam models, Camming takes us behind the webcam lens to experience the power of erotic labor in the

twenty-first century.

Sociobiological Perspectives on Human Development Mar 18 2020 Examines the importance of evolutionary biology for key issues in human development. Illustrates the power of sociobiological approaches in understanding developmental phenomena and their importance in generating new, empirically verifiable predictions.

Emotional Design in Human-Robot Interaction Jun 13 2022 While social robots participation increases in everyday human life, their presence in diverse contexts and situations is expected. At the same point, users tend to become more demanding regarding their roles, abilities, behaviour and appearance. Thus, designers and developers are confronted with the need to design more sophisticated robots that can produce such a positive reaction from users so as to become well accepted in various cases of use. Like this, Human-Robot Interaction has become a developing area. Emotions are an important part in human life, since they mediate the interaction with other humans, entities and/or products. In recent years, there has been an increase in the importance of emotions applied to the design field, giving rise to the so-called Emotional Design area. In the case of Human-Robot Interaction, the emotional design can help to elicit (e.g., pleasurable) or prevent (e.g., unpleasant) emotional/affective reactions/responses. This book gives a practical introduction to emotional design in human-robot interaction and supports designers with knowledge and research tools to help them take design decisions based on a User-Centred Design approach. It should also be useful to people interested in design processes, even if not directly related to the design of social robots but, instead, to other technology-based artefacts. The text is meant as a reference source with practical guidelines and advice for design issues.
