The Drama of the Gifted Child Feb 21 2023 The bestselling book on childhood trauma and the enduring effects of repressed anger and pain

Why are many of the most successful people plagued by feelings of emptiness and alienation? This wise and profound book has provided millions of readers with an answer--and has helped them to apply it to their own lives. Far too many of us had to learn as children to hide our own feelings, needs, and memories skillfully in order to meet our parents' expectations and win their "love." Alice Miller writes, "When I used the word 'gifted' in the title, I had in mind neither children who receive high grades in school nor children talented in a special way. I simply meant all of us who have survived an abusive childhood thanks to an ability to adapt even to unspeakable cruelty by becoming numb.... Without this 'gift' offered us by nature, we would not have survived." But merely surviving is not enough. *The Drama of the Gifted Child* helps us to reclaim our life by discovering our own crucial needs and our own truth. *Anti-Bias Education for Young Children and Ourselves* Nov 06 2021 Anti-bias education

begins with you! Become a skilled anti-bias teacher with this practical guidance to confronting and eliminating barriers.

Peer Play and Relationships in Early Childhood

Dec 07 2021 This book offers a rich collection of international research narratives that reveal the qualities and value of peer play. It presents new understandings of peer play and relationships in chapters drawn from richly varied contexts that involve sibling play, collaborative peer play, and joint play with adults. The book explores social strategies such as cooperation, negotiation, playing with rules, expressing empathy, and sharing imaginary emotional peer play experiences. Its reconceptualization of peer play and relationships promotes new thinking on children's development in contemporary worlds. It shows how new knowledge generated about young children's play with peers illuminates how they learn and develop within and across communities, families, and educational settings in diverse cultural contexts. The book addresses issues that are relevant for parents, early years' professionals and academics, including the role of play in learning at school, the role of adults in

self-initiated play, and the long-term impact of early friendships. The book makes clear how recent cultural differences involve digital, engineering and imaginary peer play. The book follows a clear line of argument highlighting the importance of play-based learning and stress the importance of further knowledge of children's interaction in their context. This book aims to highlight the narration of peer play, mostly leaning on a sociocultural theoretical perspective, where many chapters have a cultural-historical theoretical frame and highlight children's social situation of development. Polly Björk-Willén, Linköping University, Sweden

*Parenting Matters* Nov 18 2022 Decades of research have demonstrated that the parent-child dyad and the environment of the family"which includes all primary caregivers"are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents

and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure.

Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

**Creating a Community Approach to Serving Four-year-old Children in Wisconsin** Feb 09 2022

[Giving Love, Bringing Joy](#) May 12 2022 This is a book of gentle, loving games and songs that incorporate the healing, enlivening qualities of gesture, touch, and movement. It will be an invaluable resource for parents, kindergarten and nursery teachers, homeschoolers, or anyone with an interest in keeping in touch with the kingdom of childhood. These games and lullabies are imbued with the idea that loving contact with children helps them to establish a careful, nurturing relation with plants, animals, people and things in their surroundings, and movement leads them to a keen awareness of their important place in all of it. A companion CD, also called Giving Love, Bringing Joy, is available (sold separately).

**A 1950s Southampton Childhood** Nov 25 2020 The 1950s was a time of regeneration and change for Southampton. For children growing

up during this decade, life was changing fast. They still made their own toys and earned their own pocket money, but, on new television sets, *Andy Pandy* (1950) and *Bill and Ben* (1952) delighted them. With rationing discontinued, confectionary was on the menu again and, for children, Southampton life in the 1950s was sweet. If you saw a Laurel and Hardy performance at The Gaumont Theatre, or made dens out of bombed-out buildings, then you'll thoroughly enjoy this charming and nostalgic account of the era.

[Children's Catalog](#) Dec 15 2019

*The Poetics of Childhood* Mar 18 2020 First Published in 2003. Routledge is an imprint of Taylor & Francis, an informa company.

*Annals of the Society of the Holy childhood* Jan 08 2022

*Black Children* Oct 13 2019 *Black Children, Second Edition* collects current empirical research unique to the experiences and situations of black children and their parents.

This volume explores the meaning of this duality in four distinct environments: socioeconomic, parental, internal, and educational. The complex picture that emerges discredits many of the myths that surround black childhood development and initiates in-depth exploration into the diversities of the African American experience.

[Early Childhood Education](#) Oct 25 2020 This is the first volume in a four book series in *Early Childhood Education*. All four volumes will be released simultaneously, allowing instructors the opportunity to mix and match books into customized teaching package.

**A Love for Learning** Jun 20 2020 Gifted children are susceptible to many de-motivating factors, which can lead to depression and academic underachievement. The authors present concepts and techniques to counteract those factors, allowing a child's motivation to skyrocket. Features the Four C's of Motivation: (1) Creating Challenge; (2) Creating Control; (3)

Creating Commitment; and (4) Creating Compassion. This new book includes additional resources, books and websites for parents and teachers, and a foreword by Dr. Joanne Rand Whitmore Schwartz, former dean of the College of Education, Kent State University, and author of the classic book, "Giftedness, Conflict and Underachievement." Following a foreword and a preface, this book contains the following chapters: (1) The Turn-Off Effect; (2) a 360 Motivation; (3) Physical Reasons for Loss of Motivation; (4) Emotional Reasons for Loss of Motivation; (5) Social Reasons for Loss of Motivation; (6) School Reasons for Loss of Motivation; (7) The Four C's in Action; (8) Creating Challenge; (9) Creating Control; (10) Creating Commitment; (11) Creating Compassion; (12) The Classroom that Works; (13) Motivating Every Student--Who's in the Classroom?; (14) Questions and Answers; and (15) Parent to Parent: a Story of Hope. Endnotes, Additional Resources for Parents and

Teachers, References, Index, and About the Authors are also included.

**Good Schools for Young Children** Aug 03 2021 Primarily for the undergraduate students in early childhood education and teachers who are inexperienced or who have little training in working with young children.

*Car Trouble* Oct 17 2022 Wensley Clarkson's mum and dad lived on a different planet from most parents as he grew up in post-war London in the late 1950s and '60s. His mother spent much of her time nursing a tumbler of whisky and a bottle of pills, while his father edited one of Britain's bestselling weekly newspapers. Most children were taken to playgrounds and parks to play, but Wensley was left sitting in the front seat of the family saloon car outside pubs for hours with a bottle of pop and a packet of crisps. As a result, he got a taste for driving at a dangerously early age and created his own strange motoring netherworld away from the boozy, irresponsible, childish adults he was

supposed to look up to. Car Trouble presents a portrait of a middle-class boy virtually left to run his own life in one of the world's biggest cities. Yet through that neglect emerged a quick-witted survivor whose life was uniquely shaped by his childhood obsession with cars.

The Child Care Worker: Developmental planning

Jan 28 2021

**Why Siblings Matter** Nov 13 2019 Many people grow up with at least one sibling. These siblings are often 'fellow travellers' through adversity or significant life events; they can act as a source of support for some children while a source of conflict for others. For these reasons, siblings are a potentially powerful influence on development and this book is one of the first of its kind to provide an overview of cutting-edge psychological research on this important relationship. **Why Siblings Matter** is a cornerstone text on siblinghood. Integrating findings from a 10 year longitudinal study alongside wider research, it provides a lifespan

perspective examining the impact of sibling relationships on children's development and well-being. This text situates siblings in their historical, developmental and family context, considers the influence of siblings on children's development and adjustment, and provides an introduction to new research on siblings in diverse contexts. The authors discuss sibling relationships in varied populations such as siblings with disabilities, siblings in different cultures and siblings in non-traditional families, while also considering the practical implications of research. Covering both classical studies and new results this book offers take-home messages for promoting positive sibling interactions. It will be invaluable reading for students and researchers in developmental psychology and family studies and professionals in education, health and social work.

**The Wiley-Blackwell Handbook of Childhood Cognitive Development** Feb 15 2020 This definitive volume is the result of collaboration by

top scholars in the field of children's cognition. New edition offers an up-to-date overview of all the major areas of importance in the field, and includes new data from cognitive neuroscience and new chapters on social cognitive development and language. Provides state-of-the-art summaries of current research by international specialists in different areas of cognitive development. Spans aspects of cognitive development from infancy to the onset of adolescence. Includes chapters on symbolic reasoning, pretend play, spatial development, abnormal cognitive development and current theoretical perspectives.

[A Critical Companion to Early Childhood](#) Dec 27 2020 In this stimulating and provocative book the editors have drawn together a diverse and international range of respected authors, each of whom has taken a critical approach to the contentious question of how you define and achieve quality early childhood services. It is a book designed to provoke and promote critical

dialogue and discourse amongst practitioners and students through critical engagement with the position of the authors within the text. I believe anyone who reads this book will be inspired and motivated to challenge and extend their thinking and professional practice, adopting the critical stance which lies at the heart of quality services for children and families. Professor Chris Pascal, Director of Centre for Research in Early Childhood (CREC) Early childhood is a complex and important area of study where it is important to develop your critical thinking and reflect upon key issues. This book will help do both. It explores interrelated topics such as: Child development Play Safeguarding Professionalism Curriculum and Policy Each chapter will not only engage with what you need to know but help you develop your academic skills. The book also comes with lots of online resources which can be found at <https://study.sagepub.com/reedandwalker> and include: Podcasts from the authors of each

chapter so you can better understand the key concepts PowerPoints to help you revise the essential information Journal articles related to each chapter provide further reading Michael Reed and Rosie Walker are both Senior Lecturers in Early Childhood at the Institute of Education, University of Worcester.

*Guide Book to Childhood* Oct 05 2021

**Raising a Secure Child** Sep 16 2022 Today's parents are constantly pressured to be perfect. But in striving to do everything right, we risk missing what children really need for lifelong emotional security. Now the simple, powerful "Circle of Security" parenting strategies that Kent Hoffman, Glen Cooper, and Bert Powell have taught thousands of families are available in self-help form for the first time. You will learn: How to balance nurturing and protectiveness with promoting your child's independence. What emotional needs a toddler or older child may be expressing through difficult behavior. How your own upbringing

affects your parenting style--and what you can do about it. Filled with vivid stories and unique practical tools, this book puts the keys to healthy attachment within everyone's reach--self-understanding, flexibility, and the willingness to make and learn from mistakes. Self-assessment checklists can be downloaded and printed for ease of use.

**The Informed Parent** Sep 04 2021 The latest scientific research on home birth, breastfeeding, sleep training, vaccines, and other key topics—to help parents make their own best-informed decisions. In the era of questionable Internet "facts" and parental oversharing, it's more important than ever to find credible information on everything from prenatal vitamins to screen time. The good news is that parents and parents-to-be no longer need to rely on an opinionated mother-in-law about whether it's OK to eat sushi in your third trimester, an old college roommate for sleep-training "rules," or an online parenting group about how long you should breastfeed

(there's a vehement group for every opinion). Credible scientific studies are out there - and they're "bottom-lined" in this book. The ultimate resource for today's science-minded generation, *The Informed Parent* was written for readers who prefer facts to "friendly advice," and who prefer to make up their own minds, based on the latest findings as well as their own personal preferences. Science writers and parents themselves, authors Tara Haelle and Emily Willingham have sifted through thousands of research studies on dozens of essential topics, and distill them in this essential and engaging book. Topics include: Home birth \* Labor induction \* Vaginal birth vs. Cesarean birth \* Circumcision \* Postpartum depression \* Breastfeeding \* Vaccines \* Sleep training \* Pacifiers \* SIDS \* Bed-sharing \* Potty training \* Childhood obesity \* Food sensitivities and allergies \* BPA and plastics \* GMOs vs. organic foods \* The hygiene hypothesis \* Spanking \* Daycare vs. other childcare options Full

reference information for all citations in the book is available online at <http://theinformedparentbook.com/book-references/>

*Developmentally Appropriate Practice in Early Childhood Programs Serving Children from Birth Through Age 8, Fourth Edition (Fully Revised and Updated)* Jul 22 2020 The long-awaited new edition of NAEYC's book *Developmentally Appropriate Practice in Early Childhood Programs* is here, fully revised and updated! Since the first edition in 1987, it has been an essential resource for the early childhood education field. Early childhood educators have a professional responsibility to plan and implement intentional, developmentally appropriate learning experiences that promote the social and emotional development, physical development and health, cognitive development, and general learning competencies of each child served. But what is developmentally appropriate practice (DAP)? DAP is a framework designed to

promote young children's optimal learning and development through a strengths-based approach to joyful, engaged learning. As educators make decisions to support each child's learning and development, they consider what they know about (1) commonality in children's development and learning, (2) each child as an individual (within the context of their family and community), and (3) everything discernible about the social and cultural contexts for each child, each educator, and the program as a whole. This latest edition of the book is fully revised to underscore the critical role social and cultural contexts play in child development and learning, including new research about implicit bias and teachers' own context and consideration of advances in neuroscience. Educators implement developmentally appropriate practice by recognizing the many assets all young children bring to the early learning program as individuals and as members of families and communities. They also develop

an awareness of their own context. Building on each child's strengths, educators design and implement learning settings to help each child achieve their full potential across all domains of development and across all content areas. [The SAGE Encyclopedia of Contemporary Early Childhood Education](#) Mar 30 2021 The general public often views early childhood education as either simply "babysitting" or as preparation for later learning. Of course, both viewpoints are simplistic. Deep understanding of child development, best educational practices based on development, emergent curriculum, cultural competence and applications of family systems are necessary for high-quality early education. Highly effective early childhood education is rare in that it requires collaboration and transitions among a variety of systems for children from birth through eight years of age. The SAGE Encyclopedia of Contemporary Early Childhood Education presents in three comprehensive volumes advanced research,

accurate practical applications of research, historical foundations and key facts from the field of contemporary early childhood education. Through approximately 425 entries, this work includes all areas of child development - physical, cognitive, language, social, emotional, aesthetic - as well as comprehensive review of best educational practices with young children, effective preparation for early childhood professionals and policy making practices, and addresses such questions as: · How is the field of early childhood education defined? · What are the roots of this field of study? · How is the history of early childhood education similar to yet different from the study of public education? · What are the major influences on understandings of best practices in early childhood education?

*Developmental Psychology: Childhood and Adolescence* Jan 16 2020 This popular, topically organized, and thoroughly updated child and adolescent development text presents you with

the best theories, research, and practical advice that developmentalists have to offer today. Authors David R. Shaffer and Katherine Kipp provide you with a current and comprehensive overview of child and adolescent development, written in clear, concise language that talks to you rather than at you. The authors also focus on application showing how theories and research apply to real-life settings. As a result, you will gain an understanding of developmental principles that will help you in your roles as parents, teachers, nurses, day-care workers, pediatricians, psychologists, or in any other capacity by which you may one day influence the lives of developing persons. Available with InfoTrac Student Collections <http://gocengage.com/infotrac>. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

**Capturing Children's Meanings in Early Childhood Research and Practice** Feb 26

2021 *Capturing Children's Meanings in Early Childhood Research and Practice* draws together contemporary research and established theories to produce a unique take on the meanings children express through a range of creative tools. Drawing on Reggio Emilia and the Mosaic approach, this book provides readers with a range of strategies for accessing, recording and interpreting young children's perceptions of and responses to their experiences. Providing a synthesis of the multiple imaginative ways we can capture young children's meanings through observations, art, photo elicitation, mindfulness, music and other creative methods, Halpenny covers topics such as: Negotiating challenges presented by researching with children Frameworks for seeing and hearing children's intentions Accurately documenting and interpreting research findings Promoting children's meanings and their performance of them Moving forward with new understandings This book is an indispensable resource for

students of early childhood education, especially for courses focusing on the lived experiences of children from early to middle childhood. It is also a useful reference for those working with young children in educational and caregiving settings, and for those advocating for young children.

[The Work-Family Interface](#) Apr 18 2020 This volume focuses upon the complex nature of the work-family interface, and how families around the globe deal with the inherent dilemmas therein. Chapters examine how work affects families in both overt and discrete manners, as well as how family life, in turn, affects paid employment.

**Four Letters to the Witnesses of My Childhood** Jul 14 2022 The evocation of memory is wrought with emotional and historical significance in this distinctive holocaust memoir. With lyrical prose and remarkable candor, Helena Ganor narrates her story through a series of recently penned letters to the

significant people in her life during her wartime girlhood: her sister, mother, father, and stepmother. Both Ganor's mother and sister perished during the war. The author's letters reveal much about living in pre-war Lvov, Poland. Her descriptions of relationships between local Jews, Poles, Ukrainians, and Gypsies in Lvov lend a broad historical context to the Holocaust. Ganor combines deeply personal reminiscences of trying to survive as a secular Jew under Nazi occupation with reflections on the varied ways that humans respond in the face of utter catastrophe. Punctuating her letters with poems, Ganor's story is an inspiring contribution to Holocaust literature.

*Chinese Views of Childhood* May 20 2020  
Chinese in the twentieth century, intent on modernizing their country, condemned their inherited culture in part on the grounds that it was oppressive to the young. The authors of this pioneering volume provide us with the evidence

to re-examine those charges. Drawing on sources ranging from art to medical treatises, fiction, and funerary writings, they separate out the many complexities in the Chinese cultural construction of childhood and the ways it has changed over time. Listening to how Chinese talked about children--whether their own child, the abstract child in need of education or medical care, the ideal precocious child, or the fictional child--lets us assess in concrete terms the structures and values that underlay Chinese life.

*Scenes of Childhood. For children four or five years old* Dec 19 2022

[Transforming the Workforce for Children Birth Through Age 8](#) Apr 11 2022  
Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and

learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education

professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and

ultimately improve outcomes for children.  
*Dancing Hand, Trotting Pony: Hand Gesture Games, Songs and Movement Games for Children in Kindergarten and the Lower Grades*  
Aug 23 2020 Children love these games for the pure joy of movement. In their dancing rhythms adults, also, will find that the active involvement of the hands with the tongue revives the whole human being. In a series of happy games for the dancing, playing hand the movements of hands, fists, thumbs and pointers fit to the spoken word in poetry and song. They stimulate the speech center in the child's brain and promote speech development. A second group of games portrays animal games. These are magical, as they transform us into snail, bunny, pony and many other creatures. They lead us to the wellspring of the joy of existence and active participation in the world around us.

**The Psychology of Childhood** Jun 01 2021

**Pocket Book of Hospital Care for Children**

Jan 20 2023 The Pocket Book is for use by

doctors nurses and other health workers who are responsible for the care of young children at the first level referral hospitals. This second edition is based on evidence from several WHO updated and published clinical guidelines. It is for use in both inpatient and outpatient care in small hospitals with basic laboratory facilities and essential medicines. In some settings these guidelines can be used in any facilities where sick children are admitted for inpatient care.

The Pocket Book is one of a series of documents and tools that support the Integrated Managem.

**Children, Childhood and Irish Society, 1500**

**to the Present** Aug 15 2022 "This collection examines how attitudes to children have changed in Ireland over the centuries, and addresses how concepts of childhood in Ireland changed over time."--Goodreads.com.

*Gesture Games for Spring and Summer* Mar 10

2022 The first volume of Wilma Ellersiek's wonderful seasonal gesture games, fingerplays, and songs in the mood of the fifth. A companion

to Giving Love, Bringing Joy. This book includes 32 songs and gesture games, inspired by nature and the children themselves, designed to lead teachers, parents and children into joyful participation with nature. Margret Costanini's introduction outlines the educational basis of example and imitation behind this work. Craft directions and a biography of Wilma Ellersiek are also included. There is a companion CD (sold separately) which also includes the songs for the Autumn and Winter book.
