Computer Science & Perl Programming Jul 02 2021 In its first five years of existence, The Perl Journal ran 247 articles by over 120 authors. Every serious Perl programmer subscribed to it, and every notable Perl guru jumped at the opportunity to write for it. TPJ explained critical topics such as regular expressions, databases, and object-oriented programming, and demonstrated Perl's utility for fields as diverse as astronomy, biology, economics, AI, and games. The magazine gave birth to both the Obfuscated Perl Contest and the Perl Poetry contest, and remains a proud and timeless achievement of Perl during one of its most

exciting periods of development. Computer Science and Perl Programming is the first volume of The Best of the Perl Journal, compiled and re-edited by the original editor and publisher of The Perl Journal, Jon Orwant. In this series, we've taken the very best (and still relevant) articles published in TPJ over its 5 years of publication and immortalized them into three volumes. This volume has 70 articles devoted to hard-core computer science, advanced programming techniques, and the underlying mechanics of Perl. Here's a sample of what you'll find inside: Jeffrey Friedl on Understanding Regexes Mark Jason Dominus on optimizing your Perl programs with Memoization Damian Conway on Parsing Tim Meadowcroft on integrating Perl with Microsoft Office Larry Wall on the culture of Perl Written by 41 of the most prominent and prolific members of the closely-knit Perl community, this anthology does what no other book can, giving unique insight into the real-life applications and powerful techniques made possible by Perl. Other books tell you how to use Perl, but this book goes far beyond that: it shows you not only how to use Perl, but what you could use Perl for. This is more than just The Best of the Perl Journal -- in many ways, this is the best of Perl.

Over and Out: My Innings of a Lifetime with Test Match Special Oct 17 2022

For over half a century, Henry Blofeld has conveyed his unfailing enthusiasm for the game of cricket as a much loved broadcaster and journalist. His characteristically patrician tones, overlaid with those of the bon viveur, have delighted listeners to the BBC's Test Match Special where the personality of the broadcaster comes second only to a deep knowledge of the game and its

players. With his engaging conversational tone it is easy to see why listeners feel as if they are actually at the Test match watching in Henry's friendly company. Now that 'Blowers' has decided to declare his TMS innings closed, his book reveals the secrets of life in the commentary box and of the rich cast of characters with whom he shared it, from the early days of John Arlott and Brian Johnson to Aggers and new boys Boycott, Swann, Vaughan and Tuffers. Henry is equally revealing of his own performances and self-deprecatingly recalls his several verbal misfortunes while live broadcasting. Like the greatest commentators and writers on the game Blofeld has always understood that there is a world beyond the cricket field. Not forgetting pigeons passing, red buses and much loved cricket grounds, Henry Blofeld writes of his favourite countries, and experiences while travelling, and meeting and interviewing many cricket-loving celebrities. His passionate and entertaining book will become one of the classics of cricket's literature.
