Construction Law Dec 18 2022 Now in its second edition, *Construction Law* is the standard work of reference for busy construction law practitioners, and it will support lawyers in their contentious and non-contentious practices worldwide. Published in three volumes, it is the most comprehensive text on this subject, and provides a unique and invaluable comparative, multi-jurisdictional approach. This new edition builds on that strong foundation and has been fully updated to include extensive references to very latest case law, as well as changes to statutes and regulations. The laws of Hong Kong and Singapore are also now covered in detail, in addition to those of England and Australia. Regional Renaissance Dec 14 2019 This book examines ways in which formerly prosperous regions can renew their economy during and after a period of industrial and economic recession. Using New York's Capital Region (i.e., Albany, Troy, Schenectady, etc.) as a case study, the authors show how entrepreneurship, innovation, investment in education, research and political collaboration are critical to achieving regional success. In this way, the book provides other regions and nations with a real-life model for successful economic development. In the past half century, the United States and other nations have seen an economic decline of formerly prosperous regions as a result of new technology and globalization. One of the hardest-hit United States regions is Upstate New York or "the Capital Region"; it experienced a demoralizing hemorrhage of manufacturing companies, jobs and people to other regions and countries. To combat this, the region, with the help of state leaders, mounted a decades-long effort to renew and restore the region's economy with a particular focus on nanotechnology. As a result, New York's Capital Region successfully added thousands of well-paying, skill-intensive manufacturing jobs. New York's success story serves as a model for economic development for policy makers that includes major public investments in educational institutions and research infrastructure; partnerships between

academia, industry and government; and creation of frameworks for intra-regional collaboration by business, government, and academic actors. Featuring recommendations for best practices in regional development policy, this book is appropriate for scholars, students, researchers and policy makers in regional development, innovation, R&D policy, economic development and economic growth.

Leases Sep 03 2021 This unique book provides practical and legal clarity on all questions concerning landlord's consent, such as: What is a valid and effective request for consent? When can a tenant impose its desire for change on a reluctant landlord? What is a reasonable as opposed to an unreasonable refusal of consent? And what are the perils if either side calls it wrong? Since the last edition of this book in 2008, the law relating to landlord's consent, has evolved considerably. The purpose of this new edition is to bring that evolution into the much-loved analysis which have made practitioners say that previous editions have been that rare beast: a book about law that is actually enjoyable to read and which allows the practitioner and student clearly to see the wood for the trees.

Knowledge Economy and the City Oct 12 2019 This book explores the relationship between space and economy, the spatial expressions of the knowledge economy. The capitalist industrial economy produced its own space, which differed radically from its predecessor agrarian and mercantile economies. If a new knowledge-based economy is emerging, it is similarly expected to produce its own space to suit the new circumstances of production and consumption. If these spatial expressions do exist, even if in incomplete and partial forms, they are likely to be the model for the future of cities.

Tomorrow We're All Going to the Harvest Sep 22 2020

From its inception in 1966, the Canadian Seasonal Agricultural Worker Program (SAWP) has grown to employ approximately 20,000 workers annually, the majority from Mexico. The program has been hailed as a model that alleviates human rights concerns because, under contract, SAWP workers travel legally, receive health benefits, contribute to pensions, are represented by Canadian consular officials, and rate the program favorably. *Tomorrow We're All Going to the Harvest* takes us behind the ideology and examines the daily lives of SAWP workers from Tlaxcala, Mexico (one of the leading sending states), observing the great personal and family price paid in order to experience a temporary rise in a standard of living. The book also observes the disparities of a gutted Mexican countryside versus the flourishing agriculture in Canada, where farm labor demand remains high. Drawn from extensive surveys and nearly two hundred interviews, ethnographic work in Ontario (destination of over 77 percent of migrants in the author's sample), and quantitative data, this is much more than a case study; it situates the Tlaxcala-Canada exchange within the broader issues of migration, economics, and cultural currents. Bringing to light the historical genesis of "complementary" labor markets and the contradictory positioning of Mexican government

representatives, Leigh Binford also explores the language barriers and nonexistent worker networks in Canada, as well as the physical realities of the work itself, making this book a complete portrait of a provocative segment of migrant labor.

Judicial Review Handbook Nov 17 2022 Writing in the sixth edition of this Handbook, author Michael Fordham described his ambition when writing the first edition (and indeed all subsequent editions) of this book as "to read as many judicial review cases as I could and to try to extract, classify and present illustrations and statements of principle". Behind this aim lay the practitioner's overwhelming need to know and understand the case-law. Without it, as Fordham says "much can be achieved in public law through instinct, experience and familiarity with general principles which are broad, flexible and designed to accord with common sense". But with knowledge of the case law comes the vital ability to be able to point to and rely on an authoritative statement of principle and working illustration. Knowing the case-law is crucial: "the challenge is to find it". This, the sixth edition of the Handbook, continues the tradition established by earlier editions, in rendering the voluminous case-law accessible and knowable. This Handbook remains an indispensable source of reference and a guide to the case-law in judicial review. Established as an essential part of the library of any practitioner engaged in public law cases, the Judicial Review Handbook offers unrivalled coverage of administrative law, including,

but not confined to, the work of the Administrative Court and its procedures. Once again completely revised and up-dated, the sixth edition approximates to a restatement of the law of judicial review, organised around 63 legal principles, each supported by a comprehensive presentation of the sources and an unequalled selection of reported case quotations. It also includes essential procedural rules, forms and guidance issued by the Administrative Court. As in the previous edition, both the Civil Procedure Rules and Human Rights Act 1998 feature prominently as major influences on the shaping of the case-law. Their impact, and the plethora of cases which explore their meaning and application, were fully analysed and evaluated in the previous edition, but this time around their importance has grown exponentially and is reflected in even greater attention being given to their respective roles. Attention is also given to another new development - the coming into existence of the Supreme Court. Here Michael Fordham casts an experienced eye over the Court's work in the area of judicial review, and assesses the early signs from a Court that is expected to be one of the key influences in the development of judicial review in the modern era. The author, a leading member of the English public law bar, has been involved in many of the leading judicial review cases in recent years and is the founding editor of the Judicial Review journal. "...an institution for those who practise public law...it has the authority that comes from being compiled by an author

of singular distinction". (Lord Woolf, from the Foreword to the Fifth Edition)

Human Rights Transformed Feb 14 2020 Human rights have traditionally been understood as protecting individual freedom against intrusion by the State. In this book, Sandra Fredman argues that this understanding requires radical revision. Human rights are based on a far richer view of freedom, which goes beyond being let alone, and instead pays attention to individuals' ability to exercise their rights. This view fundamentally shifts the focus of human rights. As well as restraining the State, human rights require the State to act positively to remove barriers and facilitate the exercise of freedom. This in turn breaks down traditional distinctions between civil and political rights and socio-economic rights. Instead, all rights give rise to a range of duties, both negative and positive. However, because positive duties have for so long

been regarded as a question of policy or aspiration, little sustained attention has been given to their role in actualising human rights. Drawing on comparative experience from India, South Africa, the European Convention on Human Rights, the European Union, Canada and the UK, this book aims to create a theoretical and applied framework for understanding positive human rights duties. Part I elaborates the values of freedom, equality, and solidarity underpinning a positive approach to human rights duties, and argues that the dichotomy between democracy and human rights is misplaced. Instead, positive human rights duties should strengthen rather than substitute for democracy, particularly in the face of globalization and privatization. Part II considers justiciability, fashioning a democratic role for the courts based on their potential to stimulate deliberative democracy in the wider environment. Part III applies this framework to key positive duties, particularly substantive equality and positive duties to provide, traditionally associated with the Welfare State or socio-economic rights.

Town of Bloomsburg, Columbia County, Flood Damage Reduction Project, Integrated Feasibility Report Jan 15 2020

Current Research at Kultepe-Kanesh Jul 01 2021 The material remains and the more than 23,500 cuneiform tablets unearthed at the site of Kultepe (ancient Kanesh) shed light on social, political, and economic aspects of the Middle Bronze age (ca. 2000-1700 years

BC) in central Anatolia, but also in Upper Mesopotamia. The rich textual record provides ample information on a very sophisticated supraregional market economy, representing one of the best-documented historical cases of long-distance trade in the ancient world. Although the site was first excavated in 1893, followed by intermittent excavations between 1906 and 2005, modern scientific and interdisciplinary excavations have only been undertaken since 2006. The new scientific research at Kultepe-Kanesh has already begun amassing new data and providing us with a unique opportunity to generate new perspectives and to challenge previous models and assumptions about, for example, trade, colonialism, ethnicity, art, religious ideas, identity, and patterns of social, political, and economic organization in the Near East during the Middle Bronze Age. A primary goal of this special volume is to integrate the work of scholars in archaeology, archaeometry, bioarchaeology, geoarchaeology, and history to develop a new synthetic research paradigm for investigating issues of trade, colonialism, ethnicity, art, identity, and urbanization in the Near East in a unified fashion.

The City's Hinterland Apr 29 2021 Despite the fact that the rural commuter belts of cities are major loci of population change, economic growth and dynamic social change within city regions, most research tends to ignore this area while focusing on the built-up city core. However, with the current emphasis on the role of rural areas in policy debates, it is vital to recognize

the importance of the 'commuter belt'. By comparing four major European cities (in England, France, Germany and Spain), this book offers the first comparative investigation of the dynamism of city rural hinterlands. It assesses whether rural areas will become effectively integrated into quality of life improvements as a result of their inter-dependencies with cities, focusing on the critical arenas of employment change, housing and service provision. In doing so, it investigates how change in these three fields impact on the quality of life and physical environment of rural hinterlands.

Planning Politics in Toronto Mar 09 2022 The Ontario Municipal Board is an independent provincial planning appeals body that has wielded major influence on Toronto's urban development. In this book, Aaron A. Moore examines the effect that the OMB has had on the behavior and relationships of Toronto's main political actors, including city planners, developers, neighbourhood associations, and local politicians. Moore's findings draw on a quantitative analysis of all OMB decisions and settlements from 2000 through 2006, as well as eight in-depth case studies. The cases, which examine a variety of development proposals that resulted in OMB appeals, compare the decisions of Toronto's political actors to those typified in American local political economy analyses. A much-needed contribution to the literature on the politics of urban development in Toronto since the 1970s, *Planning Politics in Toronto* challenges

popular preconceptions of the OMB's role in Toronto's patterns of growth and change.

African Politics Jul 13 2022 In 1991 Samuel Huntington published "The Third Wave: Democratisation in the Late Twentieth Century". The book informed much of the scholarly work on

democratisation in Africa. Although comprehensive in classifying the causes and limitations of transitions to democracy, "The Third Wave" was also limited in its definition of democracy and expectations of a new democracy. This volume engages with the topics of democracy and democratisation in contemporary African politics at the local, national and continental level. It acknowledges a conceptual debt to Huntington when discussing elections, party systems, leadership and the development of continental norms of liberal democracy, but also highlights new conversations (eg: about participatory spaces) that go beyond the Third Wave.

Rural Wales in the Twenty-First Century Nov 05 2021 The book explores the complex and shifting geographies of rural Wales in the twenty first century. It draws on a broad range of recent academic and policy research to provide the most comprehensive and critical account of the spaces, places and environments of rural Wales to date. The book highlights recent processes of change as well as important continuities with the past. It also indicates the ways in which the contemporary geographies of rural Wales are bound up with rather complex connections between society, culture, economy and environment. The book consists of 16 specially commissioned chapters written by human geographers and sociologists with considerable expertise in rural studies. It is structured around five main themes. The first is concerned with society and community and explores changing rural demographics, the cultural impacts of in-migration, alternative communities and community action in rural Wales. The second theme is economy and employment, with chapters on labour markets, the eco-economy, migrant workers and market towns. The focus of the third theme is farming and food and the changing agri-food agenda in Wales. Welfare and services constitutes the

fourth theme of the book with attention given to poverty and community responses to service provision in rural areas. The final theme of the book is environment, which is explored through discussions of environmental sustainability and the post-productivist turn in forestry. The book uses these accounts of the social, economic and environmental geographies of rural Wales to provide a broader critique of rural geography and rural studies in the UK and other developed countries.
