Contract Law and Contract Practice Nov 10 2021 An oft-repeated assertion within contract law scholarship and cases is that a good contract law (or a good commercial contract law) will meet the needs and expectations of commercial contractors. Despite the prevalence of this statement, relatively little attention has been paid to why this should be the aim of contract law, how these 'commercial expectations' are identified and given substance, and what precise legal techniques might be adopted by courts to support the practices and expectations of business people. This book

explores these neglected issues within contract law. It examines the idea of commercial expectation, identifying what expectations commercial contractors may have about the law and their business relationships (using empirical studies of contracting behaviour), and assesses the extent to which current contract law reflects these expectations. It considers whether supporting commercial expectations is a justifiable aim of the law according to three well-established theoretical approaches to contractual obligations: rights-based explanations, efficiency-based (or economic) explanations and the relational contract critique of the classical law. It explores the specific challenges presented to contract law by modern commercial relationships and the ways in which the general rules of contract law could be designed and applied in order to meet these challenges. Ultimately the book seeks to move contract law beyond a simple dichotomy between contextualist and formalist legal reasoning, to a more nuanced and responsive legal approach to the regulation of commercial agreements.

Custom as a Source of Law Feb 19 2020 A central puzzle in jurisprudence has been the role of custom in law. Custom is simply the practices and usages of distinctive communities. But are such customs legally binding? Can custom be law, even before it is recognized by authoritative legislation or precedent? And, assuming that custom is a source of law, what are its constituent elements? Is proof of a consistent and long-standing practice sufficient, or must there be an extra ingredient - that the usage is pursued out of a sense of legal obligation, or, at least, that the custom is reasonable and efficacious? And, most tantalizing of all, is custom a source of law that we should embrace in modern, sophisticated legal systems, or is the notion of law from below outdated, or even dangerous, today? This volume answers these questions through a rigorous multidisciplinary, historical, and comparative approach, offering a fresh perspective on custom's enduring place in both domestic and international law.

Legal Literacy Aug 27 2020 To understand how the legal system works, students must consider the law in terms of its structures, processes, language, and modes of thought and argument—in short, they must become literate in the field.

Legal Literacy fulfills this aim by providing a foundational understanding of key concepts such as legal personhood, jurisdiction, and precedent, and by introducing students to legal research and writing skills. Examples of cases, statutes, and other legal materials support these concepts. While *Legal Literacy* is an introductory text, it also challenges students to consider critically the system they are studying. Touching on significant socio-legal issues such as access to justice, legal jargon, and plain language, Zariski critiques common legal traditions and practices, and analyzes what it means “to think like a lawyer.” As such, the text provides a sound basis for those who wish to pursue further studies in law or legal studies as well as those seeking a better understanding of how the legal field relates to the society that it serves.

Insurance Law Oct 17 2019 The third edition of *Insurance Law: Doctrines and Principles* follows the widely acclaimed first and second editions. It provides a detailed examination of the developing law of insurance, combining exposition of the law with critical analysis. The book is designed with the needs of undergraduate and postgraduate students in mind. The text is enhanced by extensive citations to case law and academic commentaries, making the book ideal for students, scholars and practitioners alike. This new edition reflects the many changes that have occurred in the law of insurance since the second edition was published in 2005. The book is divided into two parts. Part I considers the regulation of insurance business and the general principles underlying the law of insurance contracts. Part II examines the way in which these principles are shaped by the particular

insurance context in which they operate. The book is readable and authoritative, with a sound grasp of the realities of insurance practice; it is well sourced and generous with supplementary points. 'Lowry & Rawlings is a welcome addition to the ranks of insurance law textbooks and a serious contender for the student readership in this field.' Nicholas Legh-Jones QC, *Lloyds Maritime Commercial Law Quarterly* 'I recommend the book for undergraduate use, and as a starting point for postgraduate use. The book is well written and full of clear explanations of a difficult field of the law.' Neil Campbell, *Law Quarterly Review* '...can be warmly recommended for purchase or use by lecturers and students in the subject.' Dennis Dowding, *The Law Teacher* '...a very useful text on insurance law ... an eminently readable, good and critical book. It is clearly of the highest calibre.' Reuben Hasson, *Canadian Business Law Journal*

Tom Bingham and the Transformation of the Law Nov 17 2019 Tom Bingham was among the most influential judges of the twentieth century, having occupied in succession the most senior judicial offices, Master of the Rolls, Lord Chief Justice and Senior Law Lord, before retiring in 2008, at which point he devoted himself to the teaching of Human Rights Law, until his death in September 2010. His judicial and academic work has deeply influenced the development of the law in a period of substantial legal change. In particular his role in establishing the new UK Supreme Court, and his views on the rule of law and judicial independence left a profound mark on UK constitutional law. He was also instrumental in championing the academic and judicial use of comparative law, through his judicial work and involvement with the British Institute of International and Comparative Law. This volume collects around fifty essays from colleagues and those influenced by Lord Bingham, from across academia and legal practice. The essays survey Lord Bingham's pivotal role in the transformations that took place in the legal system during his career.

Fundamental Concepts of Commercial Law Apr 15 2022

This convenient compendium brings together selected key

essays spanning the career of Professor Sir Roy Goode, arguably the most influential law scholar of the last-half century. Addressing the fundamental concepts and policy issues of English domestic commercial law, and regularly referred to today by scholars and practicing lawyers; these innovative and forward-thinking essays broke new ground at the time of their original publication. The essays are grouped thematically into sections, each accompanied by an introduction from the author which sets the essays in their historical and modern context. This valuable authorial insight illuminates the way the law has developed since, and often as a result of, the publication of the papers. Further new material, written especially for this volume, includes a new essay 'Res Cogitans: Food for Thought'.

What is The Family of Law? Apr 03 2021 This book argues that the legal understanding of 'family' in the UK continues to be underpinned by the idealised image of the 'nuclear family', premised upon the traditional, gendered roles of 'father as breadwinner' and 'mother as homemaker'. This examination of the law's model of the 'family' has been prompted by the substantial reforms that have taken place in family law in recent decades, and the significant evolution in social attitudes and familial practices that has occurred in parallel. Throughout the book, the influence of the nuclear family is noted in several different contexts: various specific legal definitions of 'family', the legal regulation of adult, conjugal relationships, the attribution of legal parenthood and the construction of the role of the 'parent' within the law. Ultimately, this book argues that while these reforms have resulted in additional categories of relationship coming

to be situated within the nuclear family model, there has not, as yet, been any fundamental alteration of the underpinning concept of the nuclear family itself. This book concludes by considering the possibilities offered beyond the 'nuclear family'; exploring the reconceptualising of the legal understanding of 'family' around alternative and potentially 'radical' models of 'family'.

Making Commercial Law through Practice 1830–1970 Oct 09 2021 Making Commercial Law Through Practice 1830–1970 adds a new dimension to the history of Britain's commerce, trade manufacturing and financial services, by showing how they have operated in law over the last one hundred and forty years. In the main law and lawyers were not the driving force; regulation was largely absent; and judges tended to accommodate commercial needs, so that market actors were able to shape the law through their practices. Using legal and historical scholarship, the author draws on archival sources previously unexploited for the study of commercial practice and the law's role in it. This book will stimulate parallel research in other subject areas of law. Modern commercial lawyers will learn a great deal about the current law from the story of its evolution, and economic and business historians will see how the world of commerce and trade operated in a legal context.

Intermediation and Beyond Sep 08 2021 The global shift from the direct holding of securities by investors to the current intermediated holding system raises many important legal issues. These include the impact of the intermediated holding system on the rights of investors, and the enforcement of those rights against intermediaries and

issuers. The cross-border nature of many holding patterns adds another layer of complexity to these issues, and reduces legal certainty. Against this, intermediation offers benefits for many investors, including the ability to hold a cross-border portfolio with one intermediary, a reduction in costs and the facilitation of the use of securities in the collateral, repo, and securities lending markets. This book covers a number of legal topics relating to intermediated securities including the history of intermediation, the benefits and problems in the current intermediated holding system, and how future legal and technological developments could help to resolve these problems while retaining the benefits of intermediation. It also examines the possible impact of FinTech on this area, in particular the potential for Blockchain to be used in the issuing, holding and settlement of securities, the extent to which this will solve some of the difficulties that currently exist, and whether the use of Blockchain will create new difficulties that will need to be overcome. This book, which originated in a series of workshops organised by the Commercial Law Centre at Harris Manchester College, Oxford, will appeal to those interested in financial and corporate law, including academics, practitioners, policy makers and students.

Land of White Gloves? Dec 31 2020 Land of White Gloves? is an important academic investigation into the history of crime and punishment in Wales. Beginning in the medieval period when the limitations of state authority fostered a law centred on kinship and compensation, the study explores the effects of the introduction of English legal models,

culminating in the Acts of Union under Henry VIII. It reveals enduring traditions of extra-legal dispute settlement rooted in the conditions of Welsh Society. The study examines the impact of a growing bureaucratic state uniformity in the nineteenth century and concludes by examining the question of whether distinctive features are to be found in patterns of crime and the responses to it into the twentieth century. Dealing with matters as diverse as drunkenness and prostitution, industrial unrest and linguistic protests and with punishments ranging from social ostracism to execution, the book draws on a wide range of sources, primary and secondary, and insights from anthropology, social and legal history. It presents a narrative which explores the nature and development of the state, the theoretical and practical limitations of the criminal law and the relationship between law and the society in which it operates. The book will appeal to those who wish to examine the relationships between state control and social practice and explores the material in an accessible way, which will be both useful and fascinating to those interested in the history of Wales and of the history of crime and punishment more generally.
