A major new biography of the doctor who invented modern surgery. Brilliant, driven, but haunted by demons, William Stewart Halsted took surgery from a horrific, dangerous practice to what we now know as a lifesaving art. Halsted was born to wealth and privilege in New York City in the mid-1800s. He attended the finest schools, but he was a mediocre student. His academic interests blossomed at medical school and he quickly became a celebrated surgeon. Experimenting with cocaine as a local anesthetic, he became addicted. He was hospitalized and treated with morphine to control his craving for cocaine. For the remaining 40 years of his life he was addicted to both drugs. Halsted resurrected his career at Johns Hopkins, where he became the first chief of surgery. Among his accomplishments, he introduced the residency training system, the use of sterile gloves, the first successful hernia repair, radical mastectomy, fine silk sutures, and anatomically correct surgical technique. Halsted is without doubt the father of modern surgery, and his eccentric behavior, unusual lifestyle, and counterintuitive productivity in the face of lifelong addiction make his story unusually compelling. Gerald Imber, a renowned surgeon himself, evokes Halsted's extraordinary life and achievements and places them squarely in the historical and social context of the late 19th century. The result is an illuminating biography of a complex and troubled man, whose genius we continue to benefit from today. This book includes both theoretical and practical aspects within optics, photonics and lasers. The book provides new methods, technologies, advanced prototypes, systems, tools and techniques as well as a general survey indicating future trends and directions. The main fields of this book are Optical scattering, plasmas technologies and simulation, photonic and optoelectronic sensors and devices, optical fiber sensing and monitoring, image detection and Imaging solid state lasers and fiber lasers, and optical amplifiers. A wide range of optical materials is covered, from semiconductor based optical materials, optical crystals and optical glasses. "GENTLEWOMAN" sets out to explore the demise of femininity and class in contemporary society. Unlike any other book, the author shares a lifetime of relevant research and insight that will inform, educate and empower womanhood. The book is fresh, fun and sexy uncommon sense advice designed to facilitate a necessary conversation amongst the sexes that leads to real solutions. Documents considered by the Committee include the draft

Broad Economic Policy Guidelines (BEPG) (7828/00). The Committee's conclusion was that the BEPGs are an indication of how far member states of the EU are being asked to sign up to a comprehensive set of inter-related economic and social policy objectives by co-ordinating their budgetary and tax policies, whether or not they are members of the euro zone. This bold, globe-spanning survey is the first book to thoroughly explore the radical, long-standing interdependence between art and homosexuality. It draws examples from the full range of the Western tradition, including classical, Renaissance, and contemporary art, with special focus on the modern era. It was in the modern period, when arguments about homosexuality and the avant-garde were especially public, that our current conception of the artist and the homosexual began to take shape, and almost as quickly to overlap. Not a chronology of gay or lesbian artists, the book is a fascinating and sophisticated account of the ways two conspicuous identities have fundamentally informed one another. *Art and Homosexuality* discusses many of modernism's canonical figures--painters like Courbet, Picasso, and Pollock; writers like Whitman and Stein--and issues, such as the rise of abstraction, the avant-garde's relationship to its patrons and the political exploitation of art. It shows that many of the core ideas that define modernism are nearly indecipherable without an understanding of the paired identities of artist and homosexual. Illustrated with over 175 b/w and color images that range from high to popular culture and from Ancient Greece to contemporary America, *Art and Homosexuality* punctures the platitudes surrounding discussions of both aesthetics and sexual identity and takes our understanding of each in stimulating new directions.

Ship of the Week
By: Johan Luidens
Author Johan Luidens was serving on a Dutch merchant navy when his ship was chosen to be on *Ship of the Week*, a radio programme from 1947-1972 that gave crew members and their loved ones an opportunity for one-way communication. Because some crew members might be away for up to two years and telephone calls were difficult and expensive, this programme helped fill part of the communication void. Luidens' s fond memories of the excitement leading up to, during, and after the programme come to life in the historical novel of the same name, *Ship of the Week*. In this fictional account, Luidens brings real-world experience to the joy, sadness, embarrassment, and sometimes anger of the crew members as their relatives, sometimes inadvertently, talk about things unexpected or unwelcome. Luidens' s novel is a funny, heartwarming, and sometimes sad story that will leave readers wanting more. Bright, sociable, and on the verge of moving in with his beautiful girlfriend, Kathryn, Leo Fisch has a brilliant future ahead of him; outwardly at least, he seems happy. That is, until a sinister discovery is made in a forest near Leo's home town, and a figure from childhood re-enters his life. David Cauldwell is tough and aggressive; the very opposite of the company Leo now keeps. Unlikely friends, they are bound by a shared summer - and a shared secret - they had promised to forget. As past and present begin to close in, the comfortable life Leo has created for himself starts to unravel. Their terrible truth begins to emerge and Leo must confront not only the awkward, fragile boy he once was, but the events of that summer which threaten to destroy them both... Praise for *The Floating Island*: 'Moving, astute and arrestingly readable. I couldn't put it down.' Miranda Seymour 'Compassionate and beautifully written' Guardian 'Sensuous and evocative ... Anna Ralph has real poise' Helen Dunmore *Danger* inspires fierce passion when a serial killer threatens Chicago' s Ferraro crime family in this novel in Christine Feehan' s New York Times bestselling series. Vittorio Ferraro is a man whose family loyalty knows no bounds. He would die for his siblings and the people they love, but what he really wants is to start a family of his own. Deep down, Vittorio has always known finding a woman who could ride shadows would be nearly impossible—let alone one

who could accept his particular needs—and he never expected to find her in the middle of a kidnapping.... Grace Murphy has always been drawn to Vittorio Ferraro—or at least to the billionaire's public bad-boy persona. Now that she's under his protection and the sole focus of his intense caring, she can't help wanting to get as close to him as possible. But Grace knows her presence is putting the entire Ferraro family in danger. Her monster of a brother will never let her go, but Vittorio has no intention of losing the woman whose shadow matches his own.

Praise for Shadow Keeper “Shadow Keeper is, in a word, a keeper! If you love hot men, sexy women, the good guys winning against the bad guys, love (both sweet and ultra steamy), and family that stands together, then this book is all that and even more.” —Fresh Fiction

The award-winning creators of National Public Radio's "Ghetto Life 101" and "Remorse: The 14 Stories of Eric Morse" combine talents with a young photographer to show what life is like in one of the country's darkest places: Chicago's Ida B. Wells housing project. **Photos. Politics of Social Research** addresses itself to the question of the behavior appropriate for social scientists conducting research sponsored by or otherwise involving government agencies—our own and those of other countries. The simple patriotism that suggests that social scientists, like other citizens, should not hesitate to put their skills at the service of their government is questioned here and by practitioners. This is partly because of outright disagreement with government policies and partly because of the threat to independence posed by massive government funding. As this book plainly shows, the problems are especially acute for social scientists working abroad, where they are viewed as de facto representatives of American policy while at the same time they must accommodate to the policies of foreign governments.

Residual Stress, Thermomechanics & Infrared Imaging and Inverse Problems, Volume 6 of the Proceedings of the 2019 SEM Annual Conference & Exposition on Experimental and Applied Mechanics, the sixth volume of six from the Conference, brings together contributions to this important area of research and engineering. Chien-Yi Lu treats climate change as collateral damage of the neoliberal order established to ensure upward power and wealth redistribution. **Surviving Democracy** examines the role democracy plays in our dealings with—causing, understanding, denying, and hopefully, mitigating—climate change. Join the author as she makes a case for the impact our mindset has on our lives. As we grow into adulthood, our mindset is influenced and nurtured by the adults and others with whom we spend most of our time. Her experience as a parent and Substitute Teacher helped her recognize the overwhelming pressure our children in the 11 - 16-year-old age group undergo while transitioning from the child culture of elementary school to the young-adult culture of high-school. As the focus of the book, she is their voice. **The inspirational business story of Huawei: how to grow from start up to world leader in two decades...** With over 170,000 employees in more than 170 countries and regions, serving more than one-third of the world's population, how does entrepreneur Ren Zhengfei manage a telcoms giant called Huawei? What is the secret to Huawei's global success? In 1987, a 44-year-old man founded a telecom equipment-trading firm in Shenzhen, China, with start-up

capital of \$5,000. In 29 years, it grew to become the largest telecoms company in the world. This book goes behind the scenes to explore the story of what Ren Zhengfei did differently, how the company he started reached the top spot, and why Huawei is known as a "collective" and not a private company: Learn how this Chinese start up business became an international success Understand the business strategy, leadership skills and management philosophy of Huawei ' s entrepreneurial founder Get tips, inspiration and motivation for your own business start-up. 14 years of meticulous research and 136 senior management and employee interviews reveal how Huawei ' s international business success lies in its ability to transform the intellectual elite into a band of soldiers with the same set of values and resolve, while at the same time preventing a culture of subservience. This fascinating story provides a unique glimpse into the machinations of one of the world ' s most powerful companies. "The company serves as an example for many Chinese entrepreneurs striving to go global, and also presents valuable lessons for Western companies striving to integrate Eastern and Western values and ways of looking at business." - Co-author David De Cremer, KPMG Professor of Management Studies at Cambridge Judge Business School

If you're looking to develop tremendous will power, control over your muscles, the ability to tense and relax at will then this book is a must. Born as a small child and attacked with rickets, he shortly became a robust young lad through his practice of muscle control. He went on to become one of the strongest people of his time, while maintaining a very small bodyweight. Here are Maxick's Amazing Feats Of Strength at a Weight of less than 147lbs: Right Hand Military Press, 112 pounds Right Hand Snatch, 165 pounds Right Hand Swing with Dumbbell, 150 pounds. Right Hand Jerk, 240 pounds Two Hands Military Press, 230 pounds Two Hands Clean and Jerk with Barbell, 272 pounds. Two Hands Continental Jerk with Barbell, 340

pounds In a contest at finger-pulling, in which Maxick was "unbeatable," Maxick could pull a 200-pound opponent clear across the table that separated the two men. He pressed van Diggelen (185 pounds) overhead 16 times with his right arm, while holding in his left hand a glass of beer full to the brim, without spilling a drop. Earlier that same day, he had pressed Fred Storbeek (205 pounds), who was then the heavyweight British Empire Boxing Champion, 11 times with his right arm. Holding van Diggelen aloft on one arm, Maxick ran up two flights of stairs with him and then ran down the two flights. Then standing on his hands, he in that position ran up the two flights and down again. Pretty amazing stuff right? And Maxick attributes his strength to muscle control. Plus here is what Maxick has to say regarding the Mind-Muscle connection: "THE SERIOUS student of muscle-control will soon become aware of the fact that his willpower had become greater, and his mental faculties clearer and capable of increased concentration. Thus it will be observed that the controlling of the muscles reacts upon the mind and strengthens the mental powers in exactly the same proportion that the control of the muscles strengthens the body and limbs." Mapping of animal genomes has generated huge databases and several new concepts and strategies, which are useful to elucidate origin, evolution and phylogeny. Genetic and physical maps of genomes further provide precise details on chromosomal location, function, expression and regulation of academically and economically important genes. The series Genome Mapping and Genomics in Animals provides comprehensive and up-to-date reviews on genomic research on a large variety of selected animal systems, contributed by leading scientists from around the world. This volume summarizes the first era of genomic studies of aquaculture species, in which the tools and resources necessary to support whole-genome sequencing were developed. These tools will enhance efforts toward selective breeding of aquaculture species. Included in this volume are summaries of work on salmonids, cyprinids, catfish, tilapias, European sea bass, Japanese flounder, shrimps and oysters. In L. E.
