Building the Virtual State Apr 11 2022 The benefits of using technology to remake government seem almost infinite. The promise of such programs as user-friendly "virtual agencies" and portals where citizens can access all sections of government from a single website has excited international attention. The potential of a digital state cannot be realized, however, unless the rigid structures of the contemporary bureaucratic state change along with the times. Building the Virtual State explains how the American public sector must evolve and adapt to exploit the possibilities of digital governance fully and fairly. The book finds that many issues involved in integrating technology and government have not been adequately debated or even recognized. Drawing from a rich collection of case studies, the book argues that the real challenges lie not in achieving the technical capability of creating a government on the web, but rather in overcoming the entrenched organizational and political divisions within the state. Questions such as who pays for new government websites, which agencies will maintain the sites, and who will ensure that the privacy of citizens is respected reveal the extraordinary obstacles that confront efforts to create a virtual state. These political and structural battles will influence not only how the American state will be remade in the Information Age, but also who will be the winners and losers in a digital society.

Investigating Welfare State Change Sep 04 2021 Contemporary accounts of welfare state change have produced conflicting findings and incompatible theoretical explanations. By discussing the most salient aspects of the 'dependent variable problem', this work offers suggestions as to how the problem might be tackled within empirical cross-national analyses of modern welfare states.

[TIP 35: Enhancing Motivation for Change in Substance Use Disorder Treatment \(Updated 2019\)](#) Mar 30 2021 Motivation is key to substance use behavior change. Counselors can support clients' movement toward positive changes in their substance use by identifying and enhancing motivation that already exists. Motivational approaches are based on the principles of person-centered counseling. Counselors' use of empathy, not authority and power, is key to enhancing clients' motivation to change. Clients are experts in their own recovery from SUDs. Counselors should engage them in collaborative partnerships. Ambivalence about change is normal. Resistance to change is an expression of ambivalence about change, not a client trait or characteristic. Confrontational approaches increase client resistance and discord in the counseling relationship. Motivational approaches explore ambivalence in a nonjudgmental and compassionate way.

State Formation, Regime Change, and Economic Development Jul 14 2022 Failed or weak states, miscarried democratizations, and economic underdevelopment characterize a large part of the world we live in. Much work has been done on these subjects over the latest decades but most of this research ignores the deep historical processes that produced the modern state, modern democracy and the modern market economy in the first place. This book elucidates the roots of these developments. The book discusses why China was surpassed by Europeans in spite of its early development of advanced economic markets and a meritocratic state. It also hones in on the relationship between geopolitical pressure and state formation and on the European conditions that – from the Middle Ages onwards – facilitated the development of the modern state, modern democracy, and the modern market economy. Finally, the book discusses why some countries have been able to follow the European lead in the latest generations whereas other countries have not. State Formation, Regime Change and Economic Development will be of key interest to students and researchers within political science and history as well as to Comparative Politics, Political Economy and the Politics of Developing Areas.

Feminists Rethink the Neoliberal State Nov 13 2019 A rich set of feminist perspectives on the varied and often contradictory nature of state practices, structures, and ideologies Growing socio-economic inequality and exclusion are defining features of

the twenty-first century. While debates on globalization, free trade, and economic development have been linked to the paradigm of “neo-liberalism,” it does not explain all the forms of social change that have been unfolding in comparative contexts. *Feminists Rethink the Neoliberal State* provides a timely intervention into discussions about the boundaries, practices, and nature of the post-liberalization state, suggesting that an understanding of economic policies, the corresponding rise of socio-economic inequality, and the possibilities for change requires an in-depth reconceptualization. Drawing on original field research both globally and within the United States, this volume brings together a rich set of perspectives on the varied and often contradictory nature of state practices, structures and ideologies in the post-liberalization era. The essays develop an interdisciplinary approach that treats an understanding of historically-specific forms of inequality—such as gender, race, caste, sexuality and class—as integral to, rather than as after-effects of, the policies and ideologies associated with the “neoliberal project.” The volume also tackles central questions on the restructuring of the state, the state’s power operations, the relationship between capital and the state, and its interactions with the institutions and organizational forms of civil society in the post-liberalization era. As such, *Feminists Rethink the Neoliberal State* examines both what is distinctive about this post-liberalization state and what must be contextualized as long-standing features of modern state power. A truly international and interdisciplinary volume, *Feminists Rethink the Neoliberal State* deepens our understanding of how policies of economic liberalization shape and produce various forms of inequality.

State of Change Nov 18 2022 Colorado has recently been at the center of major shifts in American politics. Indeed, over the last several decades the political landscape has altered dramatically on both the state and national levels. *State of Change* traces the political and demographic factors that have transformed Colorado, looking beyond the major shift in the dominant political party from Republican to Democratic to greater long-term implications. The increased use of direct democracy has resulted in the adoption of term limits, major reconstruction of fiscal policy, and many other changes in both statutory and constitutional law. Individual chapters address these changes within a range of contexts--electoral, political, partisan, and institutional--as well as their ramifications. Contributors also address the possible impacts of these changes on the state in the future, concluding that the current state of affairs is fated to be short-lived. *State of Change* is the most up-to-date book on Colorado politics available and will be of value to undergraduate- and graduate-level students, academics, historians, and anyone involved with or interested in Colorado politics.

Climate Change, Policy and Security Jun 01 2021 This book examines the multiple strategies proposed by the international community for addressing global climate change (GCC) from both human and state-security perspectives. It examines what is needed from major states working within the UN framework to engage with the multiple dimensions of a strategy that addresses GCC and its impacts, where such engagement promotes both human and state security. Two broad frameworks for approaching these issues provide the basis of discussion for the individual chapters, which discuss the strategies being undertaken by major state powers (the US, the EU, China, India, Japan, and Russia). The first framework considers the multiple strategies, mitigation, adaptation, and capacity-building required of the international community to address the effects of GCC. The second framework considers the differentiation of GCC policies in terms of security and how the efficacy of these strategies could be impacted by whether priority is given to state security over human security concerns. This book will be of much interest to students of human security, climate change, foreign policy, and International Relations.

Climate Change and Indigenous Peoples in the United States May 20 2020 With a long history and deep connection to the Earth’s resources, indigenous peoples have an intimate understanding and ability to observe the impacts linked to climate change. Traditional ecological knowledge and tribal experience play a key role in developing future scientific solutions for adaptation to the impacts. The book explores climate-related issues for indigenous communities in the United States, including loss of traditional knowledge, forests and ecosystems, food security and traditional foods, as well as water, Arctic sea ice loss, permafrost thaw and relocation. The book also highlights how tribal communities and programs are responding to the changing environments. Fifty authors from tribal communities, academia, government agencies and NGOs contributed to the book. Previously published in *Climatic Change*, Volume 120, Issue 3, 2013.

State of the Masses Dec 15 2019 Is the consciousness of Americans in the midst of dramatic transformation? Or do people think and feel much the same as they have always thought and felt? Do most people enjoy their work, or hate it? Is the American family being replaced by new institutional forms, or is it much the same as it was in the 1950's? Have material values been replaced by a "postmaterial consciousness" in a postindustrial society? Are Americans becoming more conservative, less conservative, or staying about the same? *State of the Masses* asks the important questions. Originally published in 1986, this prescient study evaluate the views of social critics, neo-conservatives, neo-Marxists, post-industrialists, and the theorists of the little man, who puport to describe the nature, social conditions, outlooks, and motivations of the American populace. The claims of one group are often diametrically opposed to those of another. The authors make the case for which claims can be considered true and which false. Hamilton and Wright analyze the contradictory claims and compares their implications with the best social science research and data available at that time. They also explore the implications for theories in light of the conflicting portrait the evidence provides. The authors conclude with a new perspective for understanding continuities and changes in the United States. This is a prescient view of American society during turmoil, and a model for how social science research can be used predictively.

The State and Social Change in Early Modern England, 1550–1640 Feb 09 2022 This is a study of the social and cultural implications of the growth of governance in England in the century after 1550. It is principally concerned with the role played by the middling sort in social and political regulation, especially through the use of the law. It discusses the evolution of public policy in the context of contemporary understandings, of economic change; and analyses litigation, arbitration, social welfare, criminal justice, moral regulation and parochial analyses administration as manifestations of the increasing role of the state in early modern England.

Designing Kinetics for Architectural Facades Sep 16 2022 Architectural facades now have the potential to be literally kinetic, through automated sunscreens and a range of animated surfaces. This book explores the aesthetic potential of these new types of moving facades. Critique of theory and practice in architecture is combined here with ideas from kinetic art of the 1960's. From this background the basic principles of kinetics are defined and are used to generate experimental computer animations. By classifying the animations, a theory of kinetic form called 'state change' is developed. This design research provides a unique and timely resource for those interested in the capacity of kinetics to enliven the public face of architecture. Extra material including animations can be seen at www.kineticarch.net/statechange

Underwater Jul 22 2020 Communities around the United States face the threat of being underwater. This is not only a matter of rising waters reaching the doorstep. It is also the threat of being financially underwater, owning assets worth less than the money borrowed to obtain them. Many areas around the country may become economically uninhabitable before they become physically unlivable. In *Underwater*, Rebecca Elliott explores how families, communities, and governments confront problems of loss as the climate changes. She offers the first in-depth account of the politics and social effects of the U.S. National Flood Insurance Program (NFIP), which provides flood insurance protection for virtually all homes and small businesses that require it. In doing so, the NFIP turns the risk of flooding into an immediate economic reality, shaping who lives on the waterfront, on what terms, and at what cost. Drawing on archival, interview, ethnographic, and other documentary data, Elliott follows controversies over the NFIP from its establishment in the 1960s to the present, from local backlash over flood maps to Congressional debates over insurance reform. Though flood insurance is often portrayed as a rational solution for managing risk, it has ignited recurring fights over what is fair and valuable, what needs protecting and what should be let go, who deserves assistance and on what terms, and whose expectations of future losses are used to govern the present. An incisive and comprehensive consideration of the fundamental dilemmas of moral economy underlying insurance, *Underwater* sheds new light on how Americans cope with loss as the water rises.

Crisis Narratives, Institutional Change, and the Transformation of the Japanese State Feb 26 2021 Looking at Japan, traces crisis narratives across three decades and ten policy fields, with the aim of disentangling discursively manufactured crises from actual policy failures. Mired in national crises since the early 1990s, Japan has had to respond to a rapid population decline; the Asian and global financial crises; the 2011 triple disaster of earthquake, tsunami, and the Fukushima nuclear meltdown; the COVID-19 pandemic; China's economic rise; threats from North Korea; and massive public debt. In *Crisis Narratives, Institutional Change, and the Transformation of the Japanese State*, established specialists in a variety of areas use a coherent set of methodologies, aligning their sociological, public policy, and political science and international relations perspectives, to account for discrepancies between official rhetoric and policy practice and actual perceptions of decline and crisis in contemporary Japan. Each chapter focuses on a distinct policy field to gauge the effectiveness and the implications of political responses through an analysis of how crises are narrated and used to justify policy interventions. Transcending boundaries between issue areas and domestic and international politics, these essays paint a dynamic picture of the contested but changing nature of social, economic, and, ultimately political institutions as they constitute the transforming Japanese state. Sebastian Maslow is Senior Lecturer in International Relations at Sendai Shirayuri Women's College in Japan. He is the coeditor (with Ra Mason and Paul O'Shea) of *Risk State: Japan's Foreign Policy in an Age of Uncertainty*. Christian Wirth is Research Fellow at the German Institute for Global and Area Studies (GIGA) and Adjunct Research Fellow at the Griffith University Asia Institute. He is the author of *Danger, Development and Legitimacy in East Asian Maritime Politics: Securing the Seas, Securing the State*.

Learning the meaning of change-of-state verbs Sep 23 2020 Causative change-of-state verbs like 'to open', 'to fill', and 'to wake' are central to both recent theories of grammatical development and theories of lexical structure. This book focuses on how German-speaking children learn the meaning of change-of-state verbs. It offers a thorough characterization of the acquisition of German, embedded in a crosslinguistic perspective. The author provides a comprehensive review of the acquisition literature on that topic and introduces a new account as to how the meaning of these verbs can be learned. The empirical backbone of the investigation are a set of carefully designed experimental studies.

States and Nature May 12 2022 Under what circumstances might climate change lead to negative security outcomes? Over the past fifteen years, a rapidly growing applied field and research community on climate security has emerged. While much progress has been made, we still don't have a clear understanding of why climate change might lead to violent conflict or humanitarian emergencies in some places and not others. Busby develops a novel argument - based on the combination of state capacity, political exclusion, and international assistance - to explain why climate leads to especially bad security outcomes in some places but not others. This argument is then demonstrated through application to case studies from sub-Saharan Africa, the Middle East, and South Asia. This book will provide an informative resource for students and scholars of international relations and environmental studies, especially those working on security, conflict and climate change, on the emergent practice and study of this topic, and identifies where policy and research should be headed.

Teaching Climate Change in the United States Oct 05 2021 This book highlights best practices in climate change education through the analysis of a rich collection of case studies that showcase educational programs across the United States. Framed against the political backdrop of a country in which climate change denial presents a significant threat to global action for mitigation and adaptation, each case study examines the various strategies employed by those working in this increasingly challenging sociopolitical environment. Via co-authored chapters written by educational researchers and climate change education practitioners in conversation with one another, a wide range of education programs is represented. These range from traditional institutions such as K-12 schools and universities to the contemporary learning environments of museums and environmental education centres. The role of mass media and community-level educational initiatives is also examined. The authors cover a multitude of topics, including the challenge of multi-stakeholder projects, tensions between indigenous

knowledge and scientific research, education for youth activism, and professional learning. By telling stories of success and failure from the field, this book provides climate change researchers and educators with tools to help them navigate increasingly rough and rising waters.

The Korean Women's Movement and the State Oct 13 2019 This book asks what strategies women's movements can employ to induce law and policy changes at the national level that will assist women's equality without sacrificing their feminist energy, movement cohesiveness and core feminist commitments. The book takes up this question in order to emphasize the need not only to recognize the accomplishments of women's movements through political participation, but also to analyze the process through which feminist organizations interact with formal politics. It examines the institutionalization of the Korean women's movement under the progressive presidencies of Kim Dae Jung (1998-2002) and Roh Moo Hyun (2003-2007), focusing on three major pieces of legislation concerning women's rights that were enacted during this time, and looks at the process of gender politics and the strategic bargains that needed to be made between the women's movement and other political forces in order to advance their agenda. It questions whether the institutionalization of the women's movement inevitably results in demobilization and deradicalization, and goes on to examine the relationship between the women's movement and the government over the two most women-friendly administrations in South Korean history, a period marked by flourishing civil society activism and participatory democracy.

Party System Change, the European Crisis and the State of Democracy Nov 25 2020 Party systems are crucial elements for the functioning of political systems and representative democracies. With several European countries experiencing significant changes recently, it is necessary to update our knowledge. This volume analyses party system changes in Europe in the 21st century by considering several dimensions such as interparty competition, the cleavage structure, electoral volatility and the emergence of new actors. The book describes the principal continuities and changes in party systems in Europe; analyzes the main explanations for these trends; and assesses the impact of the crisis on the patterns observed. By considering a wide range of Western and Eastern European countries, and focusing on the 'parameters' of party system change, this book seeks to fill an important gap in the literature through a comparative analysis of the evolution of party systems in Europe over the last decades. This book will be of key interest to scholars and students of political parties, party systems and politics, electoral behavior as well as more broadly to European politics, comparative politics, political representation and the quality of democracies.

Change of State Dec 19 2022 How control over information creation, processing, flows, and use has become the most effective form of power: theoretical foundations and empirical examples of information policy in the U.S., an innovator informational state. As the informational state replaces the bureaucratic welfare state, control over information creation, processing, flows, and use has become the most effective form of power. In *Change of State* Sandra Braman examines the theoretical and practical ramifications of this "change of state." She looks at the ways in which governments are deliberate, explicit, and consistent in their use of information policy to exercise power, exploring not only such familiar topics as intellectual property rights and privacy but also areas in which policy is highly effective but little understood. Such lesser-known issues include hybrid citizenship, the use of "functionally equivalent borders" internally to allow exceptions to U.S. law, research funding, census methods, and network interconnection. Trends in information policy, argues Braman, both manifest and trigger change in the nature of governance itself. After laying the theoretical, conceptual, and historical foundations for understanding the informational state, Braman examines 20 information policy principles found in the U.S. Constitution. She then explores the effects of U.S. information policy on the identity, structure, borders, and change processes of the state itself and on the individuals, communities, and organizations that make up the state. Looking across the breadth of the legal system, she presents current law as well as trends in and consequences of several information policy issues in each category affected. *Change of State* introduces information policy on two levels, coupling discussions of specific contemporary problems with more abstract analysis drawing on social theory and empirical research as well as law. Most important, the book provides a way of understanding how information policy brings about the fundamental social changes that come with the transformation to the informational state.

Adjudicating Climate Change Jan 28 2021 Courts have emerged as a crucial battleground in efforts to regulate climate change. Over the past several years, tribunals at every level of government around the world have seen claims regarding greenhouse gas emissions and impacts. These cases rely on diverse legal theories, but all focus on government regulation of climate change or the actions of major corporate emitters. This book explores climate actions in state and national courts, as well as international tribunals, in order to explain their regulatory significance. It demonstrates the role that these cases play in broader debates over climate policy and argues that they serve as an important force in pressuring governments and emitters to address this crucial problem. As law firms and public interest organizations increasingly develop climate practice areas, the book serves as a crucial resource for practitioners, policymakers and academics.

Climate Change and the Nation State Jun 13 2022 The first book to show how nationalism can help us to fight climate change. The climate emergency is intensifying, while international responses continue to falter. In *Climate Change and the Nation State*, Anatol Lieven outlines a revolutionary approach grounded in realist thinking: redefining climate change as an existential threat to nation states - which it undoubtedly is - and mobilizing both national security elites and mass nationalism. He reminds us that nationalism has proven to be the most powerful force in motivating people to care about the wellbeing of future generations. Throughout, Lieven draws on historical examples to show how earlier political movements marshaled nationalism to implement progressive social reform. In order to implement and maintain a policy revolution such as "Green New Deal," he argues, it will be necessary to create dominant national consensus like those that enabled and sustained the original New Deal and the advanced welfare states in Europe. Now updated in paperback, *Climate Change and the Nation State* is an essential contribution to the debate on how to deal with a climatic crisis that-if left unchecked-threatens the survival of every nation.

The Water Problem Aug 15 2022 Building water resilience is the single biggest challenge in a changing global climate. The

United States faces a water crisis as critical as the energy crisis that once dominated headlines. Like the energy crisis, a solution can be found. Pat Mulroy, for many years general manager of the Southern Nevada Water Authority, the lead negotiator on the Colorado River for the State of Nevada, and a Brookings fellow, has gathered a number of practitioners and scholars to show us why we face a crisis caused by climate change and what we can do to alleviate it. While the focus recently has been on California, with its water restrictions and drought, many other parts of the United States are also suffering from current and potential water shortages that will only be exacerbated by climate change. The Water Problem takes us to Miami and the problem of rising oceans fouling freshwater reservoirs; Kansas and Nebraska, where intensive farming is draining age-old aquifers; and to the Southwest United States, where growing populations are creating enormous stresses on the already strained Colorado River. Mulroy and her contributors explore not just the problems, but also what we can do now to put in place measures to deal with a very real crisis.

Allies of the State Jan 08 2022 "Allies of the State is a finely tuned laser of a book. With a rigorous yet elegant research design deployed with great dexterity, the argument unfolds in tantalizing layers, as Chen and Dickson get us closer than ever to understanding the political attitudes and behavior of China's private entrepreneurs."—Scott Kennedy, author of *The Business of Lobbying in China* --

Changes of State Oct 17 2022 This is a book about the theory of the city or commonwealth, what would come to be called the state, in early modern natural law discourse. Annabel Brett takes a fresh approach by looking at this political entity from the perspective of its boundaries and those who crossed them. She begins with a classic debate from the Spanish sixteenth century over the political treatment of mendicants, showing how cosmopolitan ideals of porous boundaries could simultaneously justify the freedoms of itinerant beggars and the activities of European colonists in the Indies. She goes on to examine the boundaries of the state in multiple senses, including the fundamental barrier between human beings and animals and the limits of the state in the face of the natural lives of its subjects, as well as territorial frontiers. Drawing on a wide range of authors, Brett reveals how early modern political space was constructed from a complex dynamic of inclusion and exclusion. Throughout, she shows that early modern debates about political boundaries displayed unheralded creativity and virtuosity but were nevertheless vulnerable to innumerable paradoxes, contradictions, and loose ends. *Changes of State* is a major work of intellectual history that resonates with modern debates about globalization and the transformation of the nation-state.

The State and Global Change Apr 30 2021 Economic liberalisation and reform are widely considered as the favourite remedies for the declining economic fortunes of the Middle Eastern and North African states in the past two decades.

International economic institutions have been among the main advocates of transition to market-led economies in the region and a force contributing to its realisation. This has placed the state at the centre of the proposed transformations, acting both as an instrument of, and an obstacle to, change. With attempts at liberalisation worldwide spanning over twenty years, the time is ripe for a re-evaluation of its premises and outcome. The essays in this volume debate the political economy of transition and reforms in the Middle East and North Africa, drawing on interdisciplinary approaches and outlooks involving international, regional and national levels of analysis. The three central themes of the book are the rationale and strategies for reform, the processes and outcomes, and the nature of the state in the changing global setting.

Welfare State Change in Leading OECD Countries Mar 10 2022 Ingmar J. Schustereder investigates the relative influence of economic globalization and post industrial developments as drivers behind recent welfare state change and examines to what extent different national systems of social protection have preserved their core institutional features over time.

Changing for Good Dec 07 2021

Motivational Interviewing in Health Care Jun 20 2020 Much of health care today involves helping patients manage conditions whose outcomes can be greatly influenced by lifestyle or behavior change. Written specifically for health care professionals, this concise book presents powerful tools to enhance communication with patients and guide them in making choices to improve their health, from weight loss, exercise, and smoking cessation, to medication adherence and safer sex practices. Engaging dialogues and vignettes bring to life the core skills of motivational interviewing (MI) and show how to incorporate this brief evidence-based approach into any health care setting. Appendices include MI training resources and publications on specific medical conditions. This book is in the Applications of Motivational Interviewing series.

The Israeli Path to Neoliberalism Jul 02 2021 In recent years, Israel has deeply and quickly transformed itself from a self-perceived social-democratic regime into a privatized and liberalized "Start-Up Nation" and a highly divided society. This transition to neoliberalism has been coupled with the adoption of a hawkish and isolationist foreign policy. How can such a deep change be explained? How can a state presumably founded on the basis of socialist ideas, turn within a few decades into a country characterized by a level of inequality comparable to that of the United States? By presenting a comprehensive and detailed analysis of the evolution of the Israeli economy from the 1930s to the 1990s, *The Israeli Path to Neoliberalism* seeks to explain the Israeli path to neoliberalism. It debunks the 'from-socialism-to-liberalization' narrative, arguing that the evolution of Israeli capitalism cannot be described or explained as a simple transplantation of imported economic models from advanced liberal democracies. Rather, it asserts that the Israeli variant of capitalism is the product of the encounter between imported Western institutional models and policy ideas, on the one hand, and domestic economic, social and security policy problems on the other. This mechanism of change enables us to understand the factors that gave rise to Israel's unique combination of liberalization and strong national sentiments. Providing an in-depth analysis of Israel's transformation to neoliberalism, the book is a valuable resource for those studying the economic history of Israel, or the political economy of late-developing countries.

State Change Feb 21 2023 "A 30-day plan to reset your mind and mood"--Jacket.

Twelve Weeks to Change a Life Feb 15 2020 Hailed as a means to transform cultural norms and change lives, violence prevention programs signal a slow-rolling policy revolution that has reached nearly two-thirds of young people in the United States today. Max A. Greenberg takes us inside the booming market for programming and onto the asphalt campuses of Los

Angeles where these programs are implemented, many just one hour a week for 12 weeks. He spotlights how these ephemeral programs, built on troves of risk data, are disconnected from the lived experiences of the young people they were created to support. Going beyond the narrow stories told about at-risk youth through data and in policy, Greenberg sketches a vivid portrait of young men and women coming of age and forming relationships in a world of abiding harm and fleeting, fragmented support. At the same time, Greenberg maps the minefield of historical and structural inequalities that program facilitators must navigate to build meaningful connections with the youth they serve. Taken together, these programs shape the stories and politics of a generation and reveal how social policy can go wrong when it ignores the lives of young people.

The United Nations, Intra-State Peacekeeping and Normative Change Apr 18 2020 The UN and Intra-State Conflict:

Problematising the Normative Connection * Rethinking the UN Through Intra-State Peacekeeping: the Analytical Framework * The UN's Role in Historical Context: Impact of Structural Tensions and Thresholds * UN Peacekeeping in Intra-State Conflicts: Evolution of the Normative Basis * The UN in the Congo Conflict: ONUC * The UN On the Cyprus Conflict: UNFICYP * The UN in the Angola Conflict: UNAVEM * The UN in the Cambodia Conflict: UNTAC * Reflections on International Normative Change.

In Search of the Canary Tree Nov 06 2021 The surprisingly hopeful story of one woman's search for resiliency in a warming world Several years ago, ecologist Lauren E. Oakes set out from California for Alaska's old-growth forests to hunt for a dying tree: the yellow-cedar. With climate change as the culprit, the death of this species meant loss for many Alaskans. Oakes and her research team wanted to chronicle how plants and people could cope with their rapidly changing world. Amidst the standing dead, she discovered the resiliency of forgotten forests, flourishing again in the wake of destruction, and a diverse community of people who persevered to create new relationships with the emerging environment. Eloquent, insightful, and deeply heartening, *In Search of the Canary Tree* is a case for hope in a warming world.

The Impact of Climate Change on the United States Economy Aug 23 2020 Applies advanced new economics methodologies to assess possible impacts of climate change on the US economy; for graduate students, researchers and policymakers.

Model Rules of Professional Conduct Mar 18 2020 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Unnatural States Dec 27 2020 *Unnatural States* is a radical critique of international theory, in particular, of the assumption of state agency—that states act in the world in their own right. Peter Lomas argues that since the universal states system is inequitable and rigid, and not all states are democracies anyway, this assumption is unreal, and to adopt it means reinforcing an unjust status quo. Looking at the concepts of state, nation, and agency, Lomas sees populations struggling to find an agreed model of the state, owing to inherited material differences; and unsurprisingly, among theorists of the nation, only controversy and a great confusion of terms. Meanwhile, the functional incarnations of the state agent are caricatures: the mandarin state, the lawyer state, the landlord state, the heir-to-history state, and the patriot state. Yet recent developments in international theory (constructivism, scientific realism, postmodernism) sacrifice state agency only at the price of an unhelpful abstraction. The states system is dysfunctional and obsolete, Lomas contends, and international theory must be recast, with morality as central, to inspire and to guide historic change. He focuses in his conclusion on prescriptions for change, led by four moral concerns: human rights, weapons of mass destruction, relations between rich and poor societies, and the environment. "I begin this book," writes Lomas, "with the commonest commonplace of international theory, to expose it as a meaningless cliché. In the masterly hands of Hobbes, it was elaborated into a shock formula for organized society, a reading of history as civilization's failure. Kant sought to rescue morality from Hobbes and create the structures of modernity, but Kant's influence is coming to an end. In the Cold War, politicians disagreeing over another philosopher almost brought the world to an end. Hence the challenges of our time. These are primary and profound. Philosophers have done much to define the modern world. The point of international theory is to change it."

State Sovereignty Aug 03 2021 Seven essays grapple with some of the paradoxes of national sovereignty in today's world, examining such dimensions as pan-Islamism, new approaches to international human rights, ethnic conflict, lessons from Yugoslavia, and Japan and the tropical forests of southeast Asia. Paper edition (unseen), \$17.95. Annotation copyrighted by Book News, Inc., Portland, OR

Georgia Politics in a State of Change Plus Mysearchlab with Etext -- Access Card Package Oct 25 2020 Updated in its 2nd edition, *Georgia Politics in a State of Change*, explores Georgia's constitution, politics, and government. It combines historical background and the most current scholarship to tell the story of Georgia politics from the state's founding to the institutions, policies, and people changing Georgia today. Written with an entertaining, conversational style, this concise text provides expansive treatment of Georgia politics and covers new ground not available in any other book on the subject.

A State of Change Jan 20 2023 Its hard to imagine Californias landscape before European explorers arrived and recorded what they saw. Laura Cunninghams research goes well beyond that and her art brings that landscape to life once again

New Challenges to Food Security Jan 16 2020 Food security is high on the political agenda. Fears about societal insecurity due to food price increases and hunger, grave scenarios regarding the effects of climate change and general uncertainty about the impacts of investments in biofuels and so-call "land grabbing" on food prices and availability have meant that food security is now recognised as being a multifaceted challenge. This book is unique in that it will bring together analyses of these different factors that impact on food security. This volume will describe a range of different perspectives on food security, with an

emphasis on the various meanings that are applied to food security “crisis”. The challenges to be reviewed include market volatility, climate change and state fragility. Analyses of responses to food security crises and risk will cover rural and urban contexts, arenas of national policy formation and global food regimes, and investment in land and productive technologies. This book is unique in two respects. First, it takes a step back from the normative literature focused on specific factors of, for example, climate change, agricultural production or market volatility to look instead at the dynamic interplay between these new challenges. It helps readers to understand that food security is not one discourse, but is rather related to how these different factors generate multiple risks and opportunities. Second, through the case studies the book particularly emphasises how these factors come together at local levels as farmers, entrepreneurs, consumers, local government officials and others are making key decisions about what will be done to address food security and whose food security will be given priority. The book will explore how food production and consumption is embedded in powerful political and market forces and how these influence local actions.
