The series builds an extensive collection of high quality descriptions of languages around the world. Each volume offers a comprehensive grammatical description of a single language

together with fully analyzed sample texts and, if appropriate, a word list and other relevant information which is available on the language in question. There are no restrictions as to language family or area, and although special attention is paid to hitherto undescribed languages, new and valuable treatments of better known languages are also included. No theoretical model is imposed on the authors; the only criterion is a high standard of scientific quality. To discuss your book idea or submit a proposal, please contact Birgit Sievert. The series Handbooks of Linguistics and Communication Science is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages, but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction. This book explores how the experiences of World War II shaped and transformed Dutch perceptions of their centuries-old empire. Focusing on the work of leading anti-Nazi resisters, Jennifer L. Foray examines how the war forced a rethinking of colonial practices and relationships. As Dutch resisters planned for a postwar world bearing little resemblance to that of 1940, they envisioned a wide range of possibilities for their empire and its territories, anticipating a newly harmonious relationship between the Netherlands and its most prized colony in the East Indies. Though most of the underground writers and thinkers discussed in this book ultimately supported the idea of a Dutch commonwealth, this structure wouldn't come to pass in the postwar period. The Netherlands instead embarked on a violent decolonization process brought about by wartime conditions in the Netherlands and the East Indies. What are rising powers? Do they challenge the international order? Why do some countries but not others become rising powers? In *Why Nations Rise*, Manjari Chatterjee Miller answers these questions and shows that some countries rise not just because they develop the military and economic power to do so but because they develop particular

narratives about how to become a great power in the style of the great power du jour. These active rising powers accept the prevalent norms of the international order in order to become great powers. On the other hand, countries which have military and economic power but not these narratives do not rise enough to become great powers--they stay reticent powers. An examination of the narratives in historical (the United States, the Netherlands, Meiji Japan) and contemporary (Cold War Japan, post-Cold War China and India) cases, *Why Nations Rise* shows patterns of active and reticent rising powers and presents lessons for how to understand the rising powers of China and India today. For centuries, Muslim countries and Europe have engaged one another through theological dialogues, diplomatic missions, political rivalries, and power struggles. In the last thirty years, due in large part to globalization and migration from Islamic countries to the West, what was previously an engagement across national and cultural boundaries has increasingly become an internalized encounter within Europe itself. Questions of the Hijab in schools, freedom of expression in the wake of the Danish Cartoon crisis, and the role of Shari'a have come to the forefront of contemporary European discourse. The *Oxford Handbook of European Islam* is the first collection to present a comprehensive approach to the multiple and changing ways Islam has been studied across European countries. Parts one to three address the state of knowledge of Islam and Muslims within a selection of European countries, while presenting a critical view of the most up-to-date data specific to each country. These chapters analyze the immigration cycles and policies related to the presence of Muslims, tackling issues such as discrimination, post-colonial identity, adaptation, and assimilation. The thematic chapters, in parts four and five, examine secularism, radicalization, Shari'a, Hijab, and Islamophobia with the goal of synthesizing different national discussion into a more comparative theoretical framework. The Handbook attempts to balance cutting edge

assessment with the knowledge that the content itself will eventually be superseded by events. Featuring eighteen newly-commissioned essays by noted scholars in the field, this volume will provide an excellent resource for students and scholars interested in European Studies, immigration, Islamic studies, and the sociology of religion. Drawing on new research, this book provides the first comprehensive English-language account of the German assault on the Netherlands in May 1940. It presents fresh and incisive analyses of German and Dutch actions at tactical, operational and strategic levels. Many people know the word denominationalism and know how important this was for how the Netherlands has organized its politics, unions, the media etc. With this book the author gives a unique portrait of the Netherlands since 1917.
