High throughput sequencing of biological sequences has become a core component of many experiments in biology. An important step in the analysis of these biological sequences is alignment to a reference genome. Alignment algorithms have existed for several decades and have evolved as sequencing technologies have progressed. The recent trend in sequencing is to generate longer reads at high throughput. This thesis introduces two new methods designed for this new type of data. The first method is for DNA sequences. By taking advantage of the longer reads, we develop a method that is several times faster than current approaches while improving the accuracy. We also propose a novel approach to reduce the memory requirement. This method is compared with popular approaches in both alignment accuracy and also the accuracy of the resulting variants called. The second method is for mRNA sequences. It leverages our approach to aligning DNA reads to align long mRNA reads. The unavoidable introns in mRNA sequences split a read into shorter sub-sequences, which makes alignment more difficult. We describe a method to align these intron junctions, resulting an method that is both faster and more accurate than current approaches. Our method is compared to a number of popular approaches based on both alignment accuracy and junction detection accuracy. Overall, the data generated by new sequencing platforms warrant development of new methods as significant improvement in speed and accuracy can be gained. Shortlisted for the 2020 Business Book Awards Why do some businesses thrive, while many more struggle and fail? A key reason – and the focus of this book – is strategic alignment. This is the careful arrangement of the various elements of an enterprise – from its business strategy to its organisation – to best support the fulfillment of its long-term purpose. The best-aligned enterprises are the best performing. Most executives recognise that their enterprises should be managed in this aligned way, but lack a robust system of thought to allow them to execute strategic alignment effectively and realise its full benefits. There are thousands of organisations globally that are operating below their potential simply because they are not aligned. This book aims to change that. In *Align*, Jonathan Trevor provides a blueprint for how strategic alignment can be effectively developed, implemented and sustained. Drawing upon active research at the University of Oxford's Saïd Business School (with contributions from the joint works of Dr Jonathan Trevor and Dr Barry Varcoe), Jonathan also provides practical case studies and evidence-based insights – culminating in a thoughtful and compelling message to help leaders everywhere to improve their alignment and enterprise performance. A smart, practical guide to rocket-powered business growth *Aligned to Achieve* puts sales and marketing on the same page, creating a revenue 'dream team' that will drive your organization to new heights. As this schism grows amidst the evolving marketplace, its effects on top and bottom line performance are being felt more than ever before. This book shows you how to bring sales and marketing together effectively once and for all, leveraging their strengths to build an unstoppable force for growth. Understand the cost of misalignment and the driving forces behind it Learn strategies for improving your culture, process, leadership, and technology to initiate and support alignment Identify the best places to modify your sales and marketing programs to kickstart collaboration and cooperation between your teams Discover how other companies are uniting their sales and

marketing teams into a single force for growth Walk away with practical advice on how to apply recommendation in the real world Misalignment is frustrating for everyone in sales, marketing, and leadership. It's also detrimental to your organization's performance—but the problem is not insurmountable. In fact, most of the obstacles it creates are self-inflicted, and entirely within control of leadership. Aligned to Achieve helps you identify and remove those obstacles, and build a culture of sustainable growth. Whether you are looking to improve your quality of life or your culture at work, ALIGN will teach you how to be more clear, calm and confident as you achieve your vision, values and goals! Renowned Stanford economist David M. Kreps reveals the fundamental principles of employee motivation. Getting your employees to do their best work has never been easy. But it is a particular challenge for knowledge workers, who must attend to many different tasks and whose to-do list is often ambiguous, requiring outside-the-box thinking. Lists of dos and don'ts are rarely effective. Instead, your best bet is to align their interests with your own—the heart of motivation—and set them free to use their own drive and creativity on their, and your, behalf. But how do you align their interests with your own? How do you avoid incentive schemes that warp priorities, encourage perfunctory and sloppy work, or cause unethical behavior? In *The Motivation Toolkit*, economist and management expert David Kreps offers a variety of tools, drawn from the disciplines of economics and social psychology, that you can adapt to your specific situation to achieve better motivation. This starts with understanding both the economic and social relationship your employees have with their work, their jobs, and your organization, then using that understanding to find economic or psychological motivators that will work. Whatever your business, and whether you're a newly minted manager, a seasoned executive hungry for your employees' best work, or a curious leader looking for new ways to be effective, *The Motivation Toolkit* will prove a useful and enlightening read. As more species' genomes are sequenced, computational analysis of these data has become increasingly important. The second, entirely updated edition of this widely praised textbook provides a comprehensive and critical examination of the computational methods needed for analyzing DNA, RNA, and protein data, as well as genomes. The book has been rewritten to make it more accessible to a wider audience, including advanced undergraduate and graduate students. New features include chapter guides and explanatory information panels and glossary terms. New chapters in this second edition cover statistical analysis of sequence alignments, computer programming for bioinformatics, and data management and mining. Practically oriented problems at the ends of chapters enhance the value of the book as a teaching resource. The book also serves as an essential reference for professionals in molecular biology, pharmaceutical, and genome laboratories. Creating and growing a business can bring up many challenges and blocks. "Align + Attract" guides you back into alignment and connection with your own wisdom. You'll see (fictitious) Anna hit up against common challenges you may recognise, and progressively come into a greater state of alignment. This book develops a new approach called parameter advising for finding a parameter setting for a sequence aligner that yields a quality alignment of a given set of input sequences. In this framework, a parameter advisor is a procedure that automatically chooses a parameter setting for the input, and has two main ingredients: (a) the set of parameter choices considered by the advisor, and (b) an estimator of alignment accuracy used to rank alignments produced by the aligner. On coupling a parameter advisor with an aligner, once the advisor is trained in a learning phase, the user simply inputs sequences to align, and receives an output alignment from the aligner, where the advisor has automatically selected the parameter setting. The chapters first lay out the foundations of parameter advising, and then cover applications and extensions of advising. The content • examines formulations of parameter advising and their computational complexity, • develops methods for learning good accuracy estimators, • presents approximation algorithms for finding good sets of parameter choices, and • assesses software implementations of advising that perform well on real biological data. Also explored are applications of parameter advising to • adaptive local realignment, where advising is performed on local regions of the sequences to automatically adapt to varying mutation rates, and • ensemble alignment, where advising is applied to an ensemble of aligners to effectively yield a new aligner of higher quality than the individual aligners in the ensemble. The book concludes by offering future directions in advising research. Within riding exists a fundamental conflict of interest: The rider needs to have control—her confidence depends on her ability to control the balance of her own body as well as that of her very powerful horse. The horse, by nature, needs to feel free—free in both mind and body to express himself through movement. In *When Two Spines Align*, author Beth Baumert, writer and editor at the equestrian magazine *Dressage Today*, resolves the freedom-control enigma by taking a close look at the individual components that make up riding and dressage and providing practical ways riders can learn to harness the balance, energies, and forces at play. Readers will discover how to use “positive tension” and their body’s “power lines” to become balanced and effective in the saddle. They will then find ways to understand and manage the horse's balance and “coordination challenges.” Ultimately, the rider learns to regulate and monitor the horse's rhythm, energy, flexion, alignment, bend, and line of travel by properly aligning her spine with his. When the center of gravity of a balanced rider is over the center of gravity of a balanced horse, that place where two spines align becomes the hub for rider and horse harmony. The Poisson spot was established using a collimated laser beam from a 3-mW diode laser. It was monitored on a quadrant detector and found to be very sensitive to vibration and air disturbances. Therefore, for future work we strongly recommend a sealed vacuum tube in which the Poisson line may be propagated. A digital single-axis feedback system was employed to generate an straight line reference (SLR) on the X axis. Pointing accuracy was better than 8 " 2 microns at a distance of 5 m. The digital system was found to be quite slow with a maximum bandwidth of 47 " 9 Hz. Slow drifts were easily corrected but any vibration over 5 Hz was not. We recommend an analog

proportional-integral-derivative (PID) controller for high bandwidth and smooth operation of the kinematic mirror. Although the Poisson alignment system (PAS) at the Advanced Photon Source is still in its infancy, it already shows great promise as a possible alignment system for the low-energy undulator test line (LEUTL). Since components such as wigglers and quadrupoles will initially be aligned with respect to each other using conventional means and mounted on some kind of rigid rail, the goal would be to align six to ten such rails over a distance of about 30 m. The PAS could be used to align these rails by mounting a sphere at the joint between two rails. These spheres would need to be in a vacuum pipe to eliminate the refractive effects of air. Each sphere would not be attached to either rail but instead to a flange connecting the vacuum pipes of each rail. Thus the whole line would be made up of straight, rigid segments that could be aligned by moving the joints. Each sphere would have its own detector, allowing the operators to actively monitor the position of each joint and therefore the overall alignment of the system.

This is the first mainstream book to look at the whole range of astrological rhythms, including the planetary retrogrades and eclipses as well as the monthly moon cycle, in order to achieve success and a more contented and naturally flowing life. This is the first-ever mainstream guide to working with the astrological cycles of the Universe. It will allow you to plan ahead and achieve more success in your projects, by taking risks at certain times and avoiding them at others, and also enable you to live more fully and joyfully, flowing with the natural rhythms of life. Accessible to complete beginners as well as offering more complex insights to those who already practise astrology, Planetology is packed full of hands-on projects to help readers work with Mercury, Venus, Mars and the sun and moon, each project with three levels of increasingly complex tasks that are designed to draw readers up to mastery level. At the book's core is Annie Botticelli's ASTRO system, which enables readers to align with each planet's motion through: Awareness (projects to work with each planet); Strategy (how to plan ahead for each cycle); Techniques (exercises that range from tapping to mineral soaks and detoxes to mantras); Remedies (such as crystals and homeopathy, all tuned into the planet under discussion); and Openness to unexpected, perhaps unwanted outcomes brought to you by Divine plan. These techniques, such as prayer and meditation, allow you to be receptive to the great universal flow that supersedes any one planetary cycle. In the midst of worldwide shaking and global anxiety, nations search for strategies. People struggle, desperate for answers. Maybe this describes you. This timely repackaged edition of *The Ancient Portals of Heaven* reminds believers that they are citizens of another world--Heaven. Your life and your world need Heaven's solutions! Today, tens of thousands of companies are struggling to become "time-based" competitors, inspired by such corporations as Motorola, General Electric, Citicorp, and a myriad of others who have cut production time in half—or more. But until now, the literature has focused on the theory and philosophy of fast cycle time, rather than the tools and techniques for implementing it. Here, for the first time, Christopher Meyer, an internationally recognized expert in cycle time reduction, presents a step-by-step blueprint for transforming traditional companies into fast cycle competitors. Meyer argues that fast cycle time is achieved not by working faster, but by aligning the organization's purpose, strategy and structure. He demonstrates how the product development cycle must become a learning laboratory in which the four continuous elements "Design, Fabricate, Assemble, and Test" are analyzed with the intent to improve strategy in the next business cycle. Analyzing strategy and core processes enables management to detect and correct problems earlier, and leverage knowledge for improved innovation and increased value for customers. Employing an ongoing case study, Core Products, Inc., throughout the text, Meyer shows how to redesign the organization for manufacturability and assembly, how to implement multifunctional teams that work, how to analyze and map critical cycle time interdependencies such as "co-location," and how to measure the impact of cycle time on business performance. Meyer's practical approach provides a simple methodology for organizations to deliver products to customers rapidly, accurately, and reliably. "Chris Meyer interrelates many pieces that we have all read about in different places into a coherent guide to making it happen. Ironically, as Meyer shows, implementing fast cycle time means almost the opposite of what most American managers are inclined to do...Many years of practical experience have shown Meyer and his colleagues the wisdom of a paradox—that to speed up you often have to slow down." —From the Foreword by Peter M. Senge

*Leading a manufacturing business does not need to be so difficult! Manufacturing can be frustrating because of endless people challenges, equipment failures, schedule interruptions, and the looming threat of major quality issues. Labor costs rise, employee and customer expectations increase, manufacturing budgets are cut – and you're required to deliver more with less. In this groundbreaking book, Kevin Snook reveals how the manufacturing leader can be instrumental in making it right. He shares simple but powerful practices for rapidly turning a manufacturing division around, distilling his 30 years of frontline experience with managing hundreds of the world's best (and worst) manufacturing companies into a step-by-step alignment process that you can use to implement change that's effective in days rather than years. Kevin has led companies around the world based on the methods of management legends like Peter F. Drucker, and has implemented lean, high-performance work systems. In the era of Industry 4.0, Kevin has built on those foundations to formulate a highly effective process for aligning your manufacturing organization to deliver sustainable growth. This message in Make It Right is clear: Leading a highly successful manufacturing company can be simple, enjoyable, and thoroughly rewarding – if you align the process from the frontline to the bottom line. USA Today and Wall Street Journal BestSeller Align, part 1 of a 3-part series, shares four simple steps that transforms the way leaders lead and renew their self-confidence. Through the process Align offers, leaders develop the courage to connect with their team in a meaningful way and start winning together. Many books have been written regarding the law of attraction. The best known one, *The Secret*, is reported to have grossed \$300 million worldwide. But what if all these books are missing the most important information we can use when it comes to activating this law in our lives? Furthermore, what if this information is purposely being suppressed—and has been for thousands of years—by entities intent on keeping humans from growing spiritually? *It's Time to Align* takes a look at how the law of attraction really works and how it is being suppressed in our lives. It also explains how to overcome this manipulation and how to experience alignment with the creative power of the universe. "Celebrity manual therapist and movement coach Aaron Alexander shows readers how posture and body alignment are powerful tools for building strength, achieving peak performance, reducing pain, and approaching the world with a new sense of confidence."-- In every challenge we are handed an opportunity to evolve into a better version of ourselves. We are given a choice - either to keep repeating the same mistakes, or to accept the invitation graciously and realize that we have the power within to be our own savior. We can learn how to heal and navigate a fulfilling life path by aligning with our soul to activate the wisdom of the Universal love that surrounds us. We can't get to this place by chance, we have to do the work. But what exactly is the work? Right here, in this book! *Align with Soul* will show you how to find your life purpose, heal your problems and live a spiritual life by understanding who you are and why you are here. *Align with Soul* will provide you with the spiritual philosophy, tools and techniques to inspire your journey of personal development toward enlightenment. This is your life manual. This is the book you've been waiting for. *Aligning for Learning* offers faculty, instructional developers, administrators, and researchers a clear model through which to approach the complexities of effective teaching and learning. The alignment model is the culmination of 20 years of research done by Donald Wulff and others at the Center for Instructional Development and Research at the University of Washington. It helps instructors incorporate instructional components and communication strategies into a representation of teaching effectiveness related to rapport, structure,

engagement, and interaction, in an effort to align themselves, their content, and their students in a consistent learning goal. Two laboratory experiments were conducted to assess human performance in aligning themselves with linear stimuli. In the first experiment, two point sources of illumination separated by a range of distances were used as stimuli and the subject's task was to align himself with the directional orientation of the aligned pair of 'dots'. In the second experiment, solid lines of different lengths were used as stimuli and the subject's task was to align himself with the directional orientation of the line. Both experiments were conducted in a completely darkened room with the stimuli illuminated by an ultraviolet light. (Author). "Ten years after a car accident paralyzed my legs, a pressure sore infection escalated into a life-or-death scenario requiring emergency surgery, followed by an extended recovery in a nursing home. For weeks, I was confined to a special medical bed, where I was not allowed to sit up, but required to remain on my back 24/7. This is the story of my search for peace and sanity during that claustrophobic confinement, which subsequently led to a deeper understanding and alignment of my internal, eternal wellbeing." Author Ashley Lyn Olson

"There has never been a more important time for healthcare to fully understand the patient experience and this book gave me greater insight into the journey. Along with some entertaining moments, the author's expressive reflections illuminate deeper themes that connect us all. Specifically, healthcare professionals and patients would all benefit from looking through the lens of her unique perspective." Allan "AJ" Johnson, MPT, Physical Therapist, Children's Hospital Director

"As a person with a disability, I am in awe of Ashley's ability to choose light over darkness and embrace beauty in all aspects of life, no matter how difficult the circumstances. Her creativity and positive mind are articulated throughout the book, teaching us that our perception can lead us from adversity to a magnificent, spiritual path of appreciation." Wendy Crawford, Co-founder of RawBeautyProject.com

"Ms. Olson's journey, as lovingly and humorously recounted in *Confined to Align*, artfully juxtaposes her rising and falling suffering with the beauty she finds in poetry, a joy list ("the smell of dirt"), a fleeting but necessary friendship (with Lola), and blissful slivers of nature. In these things she finds redemption, and her humanity becomes our own. Any physician or health care practitioner reading Ms. Olson's work will discover boundless empathy and compassion for themselves and the patients whom they serve." Jerome Bothe Deck MD, General Medicine

"Ashley's blend of poetry, diary entries and reflection immerses the reader in her world. Her positivity and thoughtful approach provide a helpful template for any struggling with adversity." Ian Ruder, Editor, *New Mobility*; United Spinal Association

"When one is paralyzed from a spinal cord injury it is so much more than just about not being able to walk. In Ashley's raw and intimate account of some of the other debilitating consequences of being paralyzed, we are taken on a journey that is simultaneously painful and up-lifting. What is thrown her way could have easily sent her into dark despair and been a depressing read, but instead we see a fierce, tenacious woman that is both samurai and mermaid (in her words), dive deep into her spirituality and choose to take control of her life. Her poetry is easily accessible and serves as a chiffon curtain to soften the harsh reality of her days in the hospital. The reader is left feeling confident that

*Ashley's life will be rich with possibilities. She's my rockstar!" Bonnie Lewkowicz, Founder, Access Northern California; Co-Founder, Dancer, AXIS Dance Company "In a time when we have all experienced isolation Ashley Olson recounts a slice of her life's journey when illness and isolation could have broken her. Instead through journal entries and poetry Ashley finds moments of hope and joy in unlikely places. This book can help others with spinal cord injury and/or disability embrace a different outlook when faced with long hospital stays and recovery. Additionally, we can all learn to look introspectively and take the time to get to know ourselves.
