**Magnum Magnum** Sep 23 2020 "Encompasses sixty years of photography by the legendary agency." —Vogue Since its founding in 1947 by Robert Capa, Henri Cartier-Bresson, George Rodger, and David "Chim" Seymour, Magnum Photos, the legendary co-operative has powerfully chronicled the peoples, cultures, events, and issues of the time. Magnum Magnum brings together the best work, celebrating the vision, imagination, and brilliance of Magnum photographers, both the acknowledged greats photography in the twentieth century--among them, Henri Cartier-Bresson, Robert Capa, Eve Arnold, Marc Riboud, and Werner Bischof--and the modern masters and rising stars of our time, such as Martin Parr, Susan Meiselas, Alec Soth, and Donovan Wylie. Organized by photographer, the book harks back to the agency's early days and the spirit that made it such a unique and creative environment, one which each of the four founding members picture-edited the others' photographs. Here a current Magnum photographer selects and critiques six key works by each of the sixty-nine featured photographers, with a commentary explaining the rational behind the choice. This new edition provides a permanent record of iconic images from the last sixty years and an insight, as seen through the critical eyes and minds of Magnum photographers, into what makes a memorable photograph.

It allows students to learn anatomy within the context of many different curricular designs, and within ever-increasing time constraints. The artwork in this textbook presents the reader with a visual image that brings the text to life and presents views that will assist in the understanding and comprehension of the anatomy. Each regional anatomy chapter consists of four consecutive sections: conceptual overview, regional anatomy, surface anatomy, and clinical cases. The Second South Asia Edition of this textbook has two volumes: Volume One—The Body, Upper Limb, Lower Limb, Abdomen, Pelvis and Perineum; and Volume Two—Thorax, Back, Head and Neck, and Neuroanatomy. New content has been added on the basis of updates in the Fourth International Edition, including the addition of a new chapter on neuroanatomy. The innovative features of the First South Asia Edition such as Set Inductions, Outlines, and Flowcharts have been improved. Students are encouraged to use online resources available on MedEnact.
