They address students in a wide variety of STEM fields at both research-intensive universities and primarily undergraduate institutions. And they focus on how first-generation college students and those from low-income backgrounds and communities historically underrepresented in science can learn to negotiate the hidden curriculum and claim their place in research settings. This new edition also serves as a companion to the authors' social accounts, including @YouInTheLab and @TheLabMentor, where they offer advice on lab life at many levels"--
