The Rice Diet Solution Jun 15 2022 Can you really lose twenty pounds in a month? Will you really keep it off this time? With *The Rice Diet Solution*, you will! The Rice Diet Program has been helping dieters successfully lose weight since 1939. Now in book form, this world-renowned weight-loss method can help you change the way you eat forever. The Rice Diet Program in Durham, North Carolina, was one of the first medical facilities in America to use diet as the primary way to treat disease. On this high-complex-carb, low-fat, and low-sodium whole-foods diet, "Ricers" lose weight faster, more safely, and more effectively than people on any other diet. Men lose on average twenty-eight to thirty pounds and women on average nineteen to twenty pounds per month! The Rice Diet also detoxes your body, ridding it of excess water weight and toxins from processed foods and the environment. The program's results have been documented by extensive studies and confirmed by thousands of people who report amazing weight loss, as well as immediate improvement in such conditions as heart disease, diabetes, and hypertension. Here's how it works: The Rice Diet strictly limits salt and sodium-rich ingredients. Salt, like refined sugar, is an appetite stimulant, so when you reduce salt intake, you lose water weight and are less inclined to overeat. The Rice Diet also limits saturated fats and instead relies on carbohydrates (fruits, vegetables, grains, and beans) as the main source of nutrition. The fiber cleanses your system and satisfies you so you feel full quickly. The Rice Diet makes it easy to limit calories; when you're eating foods that truly satisfy your hunger, it's a challenge to eat 1,500 calories per day! To make it easy to follow the program, *The Rice Diet Solution* includes hundreds of tasty, filling, easy-to-prepare recipes—some from the Rice House kitchen, others inspired by major chefs and adapted to Rice Diet standards.

Neurobiology of Monotremes May 02 2021 Neurobiology of Monotremes brings together current information on the development, structure, function and behavioural ecology of the monotremes. The monotremes are an unusual and evolutionarily important group of mammals showing striking behavioural and physiological adaptations to their niches. They are the only mammals exhibiting electroreception (in the trigeminal sensory pathways) and the echidna shows distinctive olfactory specialisations. The authors aim to close the current gap in knowledge between the genes and developmental biology of monotremes on the one hand, and the adult structure, function and ecology of monotremes on the other. They explore how the sequence 'embryonic structure > adult structure > behaviour' is achieved in monotremes and how this differs from other mammals. The work also combines a detailed review of the neurobiology of monotremes with photographic and diagrammatic atlases of the sectioned adult brains and peripheral nervous system of the short-beaked echidna and platypus. Pairing of a detailed review of the field with the first published brain atlases of two of the three living monotremes will allow the reader to immediately relate key points in the text to features in the atlases and will extend a universal system of brain nomenclature developed in eutherian brain atlases by G Paxinos and colleagues to monotremes.

The Graham Kerr Cookbook Jan 22 2023 A new edition of a beloved cookbook celebrating the classic dishes and witty humor that were signature to TV chef Graham Kerr's *The Galloping Gourmet*. With his hallmark joyous abandon, British-born chef Graham Kerr was a pioneer of food television, hosting the popular series *The Galloping Gourmet* from 1969 to 1971. Kerr presented approachable, step-by-step instructions for recipes packed with personality and flavor. A bible for generations of fans, this classic cookbook is now reissued, with new commentary from Kerr and an introduction by the Lee brothers. Kerr's knowing and fun-loving approach to home cooking was ahead of its time, and has more in common with Mario Batali's or Jamie Oliver's outlook than with his 1960s contemporaries. Like Batali, Kerr was a passionate cook who was also not afraid to have fun in the kitchen. The encyclopedic variety of recipes—ranging from the basics of brewing coffee and deep excursions into egg cookery, to more sophisticated preparations of fish and poultry—combined with Kerr's devotion to technique, ingredients, and presentation open up a world of lost classics for today's home cook. Featuring step-by-step illustrations alongside new commentary updating the recipes for contemporary tastes, this edition gives today's home chefs the best of cooking from the exuberant postwar era.
