Geriatrics for Specialists Dec 14 2019 This book aims to be a single point of reference for advances in the care of geriatric populations across medical and surgical specialties. The aging population is a unique demographic with its own health challenges. Geriatricians are specifically trained to address these challenges but few medical students or residents enter geriatrics, even as the demand for geriatric expertise increases. The practices of many medical and surgical specialists are dominated by older patients who may themselves see many specialists but rarely visit geriatricians. This updated edition elucidates the most common medical conditions seen in aging patients and translates approaches to those

conditions for physicians across specialties. Divided into three sections that assemble crosscutting issues, medical specialties, and surgical and related specialties, this book serves as a guide for clinicians of all backgrounds who will work with older patients as the demographic ages further. This second edition of *Geriatrics for Specialists* expands the number of specialist chapters to reflect growth in research in aging and clinical care for older people in dermatology, plastic surgery, and behavioral neurology. All original chapters from the first edition are extensively revised and updated to reflect the rapid growth of new knowledge in the field.

**Physician Assistants** Jul 13 2022 Explore the past, present, and future of PA practice. The authors, noted educators, researchers, and practitioners, draw on extensive research to trace the evolution of the PA's roles and responsibilities in the delivery of health care services. Their presentation of historical content balanced with discussions of the ethical, educational, legislative, and economic forces that are shaping that the profession makes this a contemporary classroom tool for PA's learning their field and their roles.

**PHYSICIAN ASSISTANT ACUTE CARE** Dec 26 2020 This is the Fourth Edition of the first compendium of acute care protocols created for the Physician Assistant. Over 140 concise, fast-reading protocols for Physician Assistants working in acute care within an emergency department, urgent care center, or family practice. Covers cardiovascular, respiratory, endocrine, toxicology,

neurology, musculoskeletal, gastrointestinal, genitourinary disorders, electrolyte and acid/base disturbances, HEENT, trauma, pediatrics, geriatrics, gynecology, infectious disease, dermatology, hematology, psychiatric and social, environmental, medications, and disease management, among others. The book provides differential diagnosis, pertinent central clinical facts, and practice guidance in a bulleted outline format, for the purpose of furthering the relationship between the Physician Assistant and the Physician and for improving patient care and safety. The author Donald Correll, M.D. is a former Emergency Department Medical Director of Jackson-Madison County General Hospital (Tennessee), which treats 85,000 acute care patients annually.

**Geriatric Medicine** Jan 15 2020 With the appearance of a textbook as comprehensive as this one, it is clear that the field of geriatrics is coming of age. The broad scope of these volumes shapes a substantial answer to the question, "What is geriatrics and why should we be interested in it?" As I see it, there are at least five reasons. First, the scientific or intellectual reason: gerontology is the study of aging from the biologic, psychological, and social perspectives. There is increasing interest in the fascinating insights into the biologic mechanisms of aging, errors in protein synthesis, DNA repair mechanisms, alterations of the neuroendocrine system, changes in the immune system, genetic controls, and somatic mutations. Second, the demographic reason: this is the century of old age. There has been a 26-year

gain in the average life expectancy. This gain compares with that acquired from 3,000 years B.C. (the Bronze Age) to the year 1900, which was about 29 years. Therefore, in one century, there has been a gain in the average life expectancy almost equal to 5,000 previous years of human history. In 1830, one of three newborn infants survived beyond 60 years of age.

**Physician Assistant: a Guide to Clinical Practice** Feb 08 2022 Here's the only book dedicated to giving you the complete information that you need to become an effective Physician Assistant and maintain those high standards in practice. This up-to-date edition covers all aspects of the physician assistant profession, the PA curriculum, and the PA's role in practice, all in an easy-to-use textbook format that features convenient tables and clear illustrations, as well as case studies and clinical application questions. You'll find this book invaluable throughout your course of study, when entering the job market, and as an excellent reference in clinical practice. And, with this Expert Consult title, you'll be able to search the entire contents of the book, online, from anywhere. Covers all the core competencies that you need to master for year one or for recertification, so you can excel. Gives you the information you need on all of the rotations and practice areas that are open to you to help you make the right decisions. Offers practical Pros and Cons box for each rotation and area of practice to aid in day-to-day decision making. Utilizes a fresh new two color format for better visual guidance. Focuses on clinical information

with case studies included at the end of each chapter. Includes a new chapter on evidence-based medicine to prepare you for daily practice. Provides Expert Consult access so you can search the entire contents of the book, online. Includes a new chapter on Physician Assistants in international medicine to keep you on the cutting edge. Your purchase entitles you to access the website until the next edition is published, or until the current edition is no longer offered for sale by Elsevier, whichever occurs first. If the next edition is published less than one year after your purchase, you will be entitled to online access for one year from your date of purchase. Elsevier reserves the right to offer a suitable replacement product (such as a downloadable or CD-ROM-based electronic version) should access to the website be discontinued.

Preventive Medicine, An Issue of Physician Assistant Clinics, E-Book Oct 24 2020 In this issue of Physician Assistant Clinics, guest editor Stephanie L. Neary brings her considerable expertise to the topic of Preventative Medicine. Provides in-depth, clinical reviews on the latest updates in Preventative Medicine, providing actionable insights for clinical practice. Presents the latest information on this timely, focused topic under the leadership of experienced editors in the field; Authors synthesize and distill the latest research and practice guidelines to create these timely topic-based reviews.

Geriatric Pharmacology Sep 15 2022 Now in its second edition, Geriatric Pharmacology: The Principles of Practice & Clinical Recommendations is the optimal guide for

anyone seeking straightforward, concise and user-friendly information on medication dynamics for older adults. Fully revised and updated, this invaluable resource has become the go-to favorite for healthcare professionals. Here's what you'll find: Learn to manage medication combinations without causing harm How to safely prescribe opioids Avoiding the top 10 most dangerous geriatric drugs Practical guidelines to stop and start prescriptions Drug-drug interaction charts and strategies

*A Comprehensive Review For the Certification and*

*Recertification Examinations for Physician Assistants* Mar 17 2020 The new, fifth edition of *A Comprehensive Review for the Certification and Recertification Examinations for Physician Assistants* is the foremost trusted preparation resource for the PANCE and PANRE. The text features high-yield outline-format review and pretest and post-test questions based on the blueprint of the National Commission on Certification of Physician Assistants (NCCPA). Developed and endorsed by the American Academy of Physician Assistants (AAPA) and the Physician Assistant Education Association (PAEA), this edition's content reflects up-to-date information and has been reviewed and validated by subject matter experts working hard in the field.

**The Business of Geriatrics** Aug 22 2020 This book takes a fresh look at how caring for Medicare beneficiaries can lead to success in today's healthcare marketplace. Using examples from highly successful practice models, the book will take the reader through the key components necessary to run a profitable geriatric practice. The author, who co-founded what became one of the largest geriatric private practices in the country, discusses each part of the continuum of care from the perspective of the provider-client relationship, highlighting the importance of business cultures in this environment. The text also features an overview of payment models, starting with traditional fee-for-service, insurance (Medicare HMO's), and finishing with the concept of bundled payment models that have been heralded as the future of physician

reimbursement. Finally, this book focuses on the practical aspects of business planning, budgeting and hiring and concludes with chapters about the key challenges faced by a geriatric practice, focusing on provider productivity, coding and billing, and dealing with potential competition in the marketplace. *The Business of Geriatrics* is the ultimate business guide for primary care physicians, geriatricians, residents, medical students, healthcare administrators, policymakers, business and medical administrative students, and practice managers.

**The Physician Assistant Practice Guide - Second Edition** Nov 05 2021 The Second Edition of the first compendium of acute care practice guides created for the Physician Assistant. Over 140 concise, fast-reading practice guides for Physician Assistants working in acute care within an emergency department, urgent care center, or family practice. Covers cardiovascular, respiratory, endocrine, toxicology, neurology, musculoskeletal, gastrointestinal, genitourinary disorders, electrolyte and acid/base disturbances, HEENT, trauma, pediatrics, geriatrics, gynecology, infectious disease, dermatology, hematology, psychiatric and social, environmental, medications, and disease management, among others. The book provides differential diagnosis, pertinent central clinical facts, and practice guidance in a bulleted outline format, for the purpose of furthering improved patient care and safety. The author Donald Correll, M.D. is the Emergency Department Medical Director of Jackson-Madison County General Hospital

(Tennessee), which treats 85,000 acute care patients annually.

**Physician Assistant Acute Care Protocols** Sep 03 2021 The first compendium of acute care protocols created for the Physician assistant. Over 130 concise, fast-reading, bulleted protocols for Physician assistants working in acute care within an emergency department, urgent care center, family or office practice. Covers cardiovascular, respiratory, endocrine, toxicology, neurology, musculoskeletal, gastrointestinal, genitourinary disorders, electrolyte and acid/base disturbances, HEENT, trauma, pediatrics, geriatrics, gynecology, infectious disease, dermatology, hematology, psychiatric and social, environmental, medications, and disease management, among others. This book has evidenced-based care and best practices, provides a framework for the Physician assistant interaction with physicians, and is a Risk Management tool to decrease adverse outcomes. The Protocols and Practice Guide have similar clinical content --- The author Donald Correll, M.D. is the Emergency Department Medical Director of Jackson-Madison County General Hospital (Tennessee), which treats 85,000 patients annually.

Physician Assistant Acute Care Protocols and Disease Management - Third Edition: For Family Practice, Urgent Care, and Emergency Medicine Apr 29 2021 This is the Third Edition of a compendium of acute care protocols and

disease management guides created for the Physician Assistant. Over 150 concise, fast-reading protocols for Physician Assistants working in family practice, urgent care, and emergency medicine. Covers cardiovascular, respiratory, endocrine, toxicology, neurology, musculoskeletal, gastrointestinal, genitourinary disorders, electrolyte and acid/base disturbances, HEENT, trauma, pediatrics, geriatrics, gynecology, infectious disease, dermatology, hematology, psychiatric and social, environmental, medications, and disease management, among others. The book provides differential diagnosis, pertinent central clinical facts, and practice guidance in a bulleted outline format, for the purpose of furthering the relationship between the Physician Assistant and the Physician and for improving patient care and safety. The author Donald Correll, M.D. is a former Emergency Department Medical Director of Jackson-Madison County General Hospital (Tennessee), which treats 85,000 acute care patients annually.

**Retooling for an Aging America** Oct 12 2019 As the first of the nation's 78 million baby boomers begin reaching age 65 in 2011, they will face a health care workforce that is too small and woefully unprepared to meet their specific health needs. *Retooling for an Aging America* calls for bold initiatives starting immediately to train all health care providers in the basics of geriatric care and to prepare family members and other informal caregivers, who currently receive little or no training in how to tend to their aging loved ones. The book also

recommends that Medicare, Medicaid, and other health plans pay higher rates to boost recruitment and retention of geriatric specialists and care aides. Educators and health professional groups can use *Retooling for an Aging America* to institute or increase formal education and training in geriatrics. Consumer groups can use the book to advocate for improving the care for older adults. Health care professional and occupational groups can use it to improve the quality of health care jobs.

**Geriatrics, An Issue of Physician Assistant Clinics E-Book** Jan 19 2023 This issue of *Physician Assistant Clinics*, devoted to Geriatrics, is guest edited by Steven D. Johnson, PA-C. Articles in this issue include: Falls and the Older Adult: Prevention and evaluation; Cognitive Decline and Dementia; Shared Medical Appointments for Older Adults; Advanced Care Planning and Physician Orders for Life-Sustaining Treatment Program (POLST); Palliative Care; Home Care; Successful Aging; Functional Assessment and Pain Management; and more! CME is also available for subscribers to the series.

Next Medicine Dec 18 2022 Every year, the average American spends about \$7,300 on medical expenses. The typical Canadian pays \$2,700, the Briton only \$2,000. And yet, according to the World Health Organization, our healthcare system, in terms of total quality, ranks thirty-eighth in the world, right between Costa Rica and Slovenia. Not only do 40 million Americans lack health insurance, but more than 200,000 die each year because of medical mistakes. Our average life expectancy is lower

than Cuba's. In *Next Medicine*, Dr. Walter Bortz zeroes in on why the American medicine is spiraling toward disaster. A physician with fifty years of experience and a leading authority on aging, Bortz argues that the financial interests of biotech and drug companies have distorted the healthcare system. Thanks to them, medicine today is economically motivated to treat disease rather than to prevent it. Heart disease, for example, is widely treated with drug interventions and invasive surgery--both of which are extravagantly profitable for pharmaceutical giants and hospitals. Daily exercise and a healthy diet, on the other hand, can prevent heart disease, and can be obtained by patients essentially for free--but there's no money in that. The medical-industrial complex has a vested interest in keeping us sick, and until that changes medicine will fail to effectively address the leading cause of disability and mortality today: chronic diseases like diabetes that are largely preventable. Bortz proposes a medical system that emphasizes personal responsibility and provides incentives for healthy lifestyle choices, along with new training for medical professionals. Through a lively narrative full of personal anecdotes and jarring statistics, Bortz makes a powerful case for a radically new medical system--one that is based on rigorous science and loosens the strangle hold of corporate interests on American health.

[The Preceptor's Handbook for Supervising Physician Assistants](#) Jan 07 2022 [The Preceptor's Handbook for Supervising Physician Assistants](#) is a helpful guide for

clinical preceptors of physician assistant (PA) students during their educational program and for physicians who supervise PAs in their practice. This work encompasses the experience and passion of four dedicated PA educators with combined experience of over 100 years. This indispensable resource addresses current practice as well as future projections and provides guidance for new styles of supervision in evolving health care systems including distance supervision, supervision in teams, and patterns of supervision in home care and geriatrics. Covering a wide variety of topics including supervision in the team environment as well as in individual practice, this handbook will provide the physician and physician assistant with the information and skills needed to be an excellent preceptor for students and a supervising clinician for graduate PAs. Features • Case Studies • Job Descriptions • Performance Agreements • Evaluation Tools • Professional Improvement Plans “The uniqueness of the physician-PA team paves the way for effective physician assistant practice. The Preceptors Handbook: A Guide to Supervising Physician Assistants presents a comprehensive model to help physicians reap the benefits that PAs bring to their practice, their patients, and the health care team. This clear and accessible resource provides step-by-step guidelines for building relationships with PAs, including tips on how to hire and work effectively with a PA, how to give constructive feedback, and how to apply coaching strategies. The authors, all leaders in PA education and practice, provide the

essential information for building and sustaining a successful physician-PA team." ~ Janet J. Lathrop, MBA President, National Commission on Certification of Physician Assistants (NCCPA)

**Physician Assistant Acute Care Protocols - SIXTH EDITION** Apr 17 2020 This book comprises a compendium of acute care protocols created for physician assistants. Over 275 concise, fast-reading topics for physician assistants working in emergency medicine, urgent care and family practice. Covers cardiovascular, respiratory, endocrine, toxicology, neurology, musculoskeletal, gastrointestinal, general surgery, genitourinary disorders, electrolyte and acid/base disturbances, HEENT, trauma, pediatrics, geriatrics, gynecology, infectious disease, dermatology, hematology, psychiatric and social, and environmental emergencies, critical care, among others. Also includes an introductory acute care bedside ultrasound chapter. The book provides differential diagnosis, pertinent clinical facts, and practice guidance in a bulleted outline, double column format for improving patient care and safety. The author Donald Correll, M.D. is a former Emergency Department Medical Director of Jackson-Madison County General Hospital (Tennessee), which treats over 100,000 acute care patients annually.

**Ham's Primary Care Geriatrics E-Book** Aug 02 2021 Employing a unique case-based approach, Ham's Primary Care Geriatrics continues to be your comprehensive source of clinical solutions for this challenging population. This gerontology medical reference book features an

interdisciplinary perspective that empowers you with team-oriented knowledge on the best diagnosis, treatment, and management strategies available to address the complex needs of older adults. "Overall this is a useful, well written, practical elderly medicine book, ideal for use in primary care. It is reasonable priced and an excellent addition to the bookshelf, virtual or real".  
Reviewed by: Dr Harry Brown, July 2014 Effectively treat your geriatric patients, and provide helpful guidance to their families, through engaging geriatric case studies that illustrate the principles and key clinical information you need. Form a definitive diagnosis and create the best treatment plans possible using the evidence-based medicine guidelines throughout. Find the information you need quickly and efficiently with a 2-color layout and consistent format, and test your knowledge with USMLE-style questions in every chapter. Offer your geriatric patients the most up-to-date treatment options available with six new chapters addressing Principles of Primary Care of Older Adults, Interprofessional Team Care, Billing and Coding, Frailty, Pressure Ulcers, and Anemia. Access the complete geriatric text online anytime, anywhere at Expert Consult, along with an online Cognitive Status Assessment with four tests and patient teaching guides, a dermatology quiz, and informative videos on Gait and Balance and Dizziness.
