The advent of photography revolutionized perception, making visible what was once impossible to see with the human eye. In *At the Edge of Sight*, Shawn Michelle Smith engages these dynamics of seeing and not seeing, focusing attention as much on absence as presence, on the invisible as the visible. Exploring the limits of photography and vision, she asks: What fails to register photographically, and what remains beyond the frame? What is hidden by design, and what is obscured by cultural blindness? Smith studies manifestations of photography's brush with the unseen in her own photographic work and across the wide-ranging images of early American photographers, including F. Holland Day, Eadweard Muybridge, Andrew J. Russell, Chansonetta Stanley Emmons, and Augustus Washington. She concludes by showing how concerns raised in the nineteenth century remain pertinent today in the photographs of Abu Ghraib. Ultimately, Smith explores the capacity of photography to reveal what remains beyond the edge of sight. What do they all mean – the lascivious ape, autophagic dragons, pot-bellied heads, harp-playing asses, arse-kissing priests and somersaulting jongleurs to be found protruding from the edges of medieval buildings and in the margins of illuminated manuscripts? Michael Camille explores that riotous realm of marginal art, so often explained away as mere decoration or zany doodles, where resistance to social constraints flourished. Medieval image-makers focused attention on the underside of society, the excluded and the ejected. Peasants, servants, prostitutes and beggars all found their place, along with knights and clerics, engaged in impudent antics in the margins of prayer-books or, as gargoyles, on the outsides of churches. Camille brings us to an understanding of how marginality functioned in medieval culture and shows us just how scandalous, subversive, and amazing the art of the time could be. *What's Out There* draws upon discoveries by the most recent space probes, bringing together more than 150 breathtaking images of the universe - from close-ups of the surface of Mars to the far reaches of space. Structured alphabetically for ease of use, the journey includes highlights such as a volcano on Jupiter's satellite Io, nebulas in Orion's belt, and the birth-pangs and death-throes of the stars. For each topic covered there is concisely accessible expert commentary, and for each photograph a caption with a data box providing key facts. From the beginning, abstraction has been intrinsic to photography, and its persistent popularity reveals much about the medium. Now available in an affordable paperback edition, *The Edge of Vision: The Rise of Abstraction in Photography* is the first book in English to document this phenomenon and to put it into historical context, while also examining the diverse approaches thriving within contemporary photography. Author Lyle Rexer examines abstraction at pivotal moments, starting with the inception of photography, when many of the pioneers believed the camera might reveal other aspects of reality. *The Edge of Vision* traces subsequent explorations--from the Photo-Secessionists, who emphasized process and emotional expression over observed reality, to Modernist and Surrealist experiments. In the decades to follow, in particular from the 1950s through the 1980s, a multitude of photographers--Edward Weston, Aaron Siskind, Barbara Kasten, Ellen Carey and James Welling among them--took up abstraction from a variety of positions. Finally, Rexer explores the influence the history of abstraction exerts on contemporary thinking about the medium. Many contemporary artists--most prominently Penelope Umbrico, Michael Flomen, and Adam Broomberg and Oliver Chanarin--reject classic definitions of photography's documentary dimension in favor of other conceptually inflected possibilities, somewhere between painting and sculpture, that include the manipulation of process and printing. In addition to Rexer's engagingly written and richly illustrated history, this volume includes a selection of primary texts

from and interviews with key practitioners and critics, such as Alvin Langdon Coburn, László Moholy-Nagy, Gottfried Jäger, Silvio Wolf and Walead Beshty. "The Gilded Edge is a compelling read from start to finish. Gripping, suspenseful, cinematic. This is narrative nonfiction at its best."—Lindsey Fitzharris, bestselling author of *The Butcherer Art* Astonishingly well written, painstakingly researched, and set in the evocative locations of earthquake-ravaged San Francisco and the Monterey Peninsula, the true story of two women—a wife and a poet—who learn the high price of sexual and artistic freedom in a vivid depiction of the debauchery of the late Gilded Age Nora May French and Carrie Sterling arrive at Carmel-by-the-Sea at the turn of the twentieth century with dramatically different ambitions. Nora, a stunning, brilliant, impulsive writer in her early twenties, seeks artistic recognition and Bohemian refuge among the most celebrated counterculturalists of the era. Carrie, long-suffering wife of real estate developer George Sterling, wants the opposite: a semblance of the stability she thought her advantageous marriage would offer, threatened now that her philandering husband has taken to writing poetry. After her second abortion, Nora finds herself in a desperate situation but is rescued by an invitation to stay with the Sterlings. To Carrie's dismay, George and the arrestingly beautiful poetess fall instantly into an affair. The ensuing love triangle, which ultimately ends with the deaths of all three, is more than just a wild love story and a fascinating forgotten chapter. It questions why Nora May—in her day a revered poet whose nationally reported suicide gruesomely inspired youths across the country to take their own lives, with her verses in their pockets no less—has been rendered obscure by literary history. It depicts America at a turning point, as the Gilded Age groans in its death throes and young people, particularly women, look toward a brighter, more egalitarian future. In an unfortunately familiar development, this vision proves to be a mirage. But women's rage at the scam redefines American progressivism forever. For readers of Nathalia Holt, Denise Kiernan, and Sonia Purnell, this shocking history with a feminist bite is not to be missed. There's nothing more important to the future of your artwork than to educate and nurture the unique talent you were born to share with the world. The Canon of Design represents artistic integrity, and enables you to leave your mark on this earth as one of the most talented visual communicators ever known. Learn the language of design to stand with the great masters and reflect the beauty prominently found in nature. This field manual is written to you, for you, and will help shorten your journey to achieving artistic excellence! Create and Be Recognized is the first survey of a compelling, always surprising art form -- outsider photography. Presented here is the work of seventeen largely self-taught artists who have used photography or photographic elements in their creations, including such luminaries as Adolf Wolffli, Howard Finster, and Henry Darger, as well as discoveries from little known, equally dramatic artists. As with most outsider art, the work here is fuelled by singular passions, marginalized mindsets, and extreme circumstances, falling outside mainstream picture-making. Employing collage (affixing photos or reproductions to a background), photcollage (photographs cut and pasted together to form a new whole), and tableaux (works based on manipulation and staging), the artists here present work that is, by turns, lyrical and frightening, and always fascinating. Published to coincide with a major touring exhibition of the same name originating at San Francisco's Yerba Buena Center for the Arts, *Create and Be Recognized* documents an emerging and important facet of contemporary photography. A photography book introducing Marco Island and surrounding area by photographer Adam Koszo It is not surprising that certain artists - among them Michelangelo, Ingres, Church, Degas, van Gogh, Klimt, Whistler, Matisse, Seurat, and Mondrian - designed frames for their own pictures. Klee, Miro Kahlo, Dali, Calder, and Hockney incorporated actual frames into the works themselves."--BOOK JACKET. Photo walks are how I recharge, especially during life's unexpected changes, such as the loss of a loved one. This series of photographs are from my photo walks after the loss of my father in 2013. This journey in photos and essays takes us beyond the boundaries of the Americas that traditionally define national identity. Lovers of marine life and connoisseurs of photography will delight in this beautifully produced book dedicated to the surprising elements of the "unseen." In *Extreme Nature*, National Geographic photographer Bill Curtsinger takes us to locations around the globe, from the North to the South Poles, where he reveals in amazing detail the lives of elusive water creatures-some never before photographed-and those that are ubiquitous but rarely observed close up. These images represent some

of the best of his thirty-year career, and here he reflects on the subtle elements that make his art so powerful. The splendid photography in *Extreme Nature* is the result of a profound sensitivity to the aquatic environment. "I worship the single-minded effort that still photography embodies," Curtsinger says, "the challenge, the solitary immersion in an animal's world and the rewards that are often found in such an adventure." The reader accompanies him on these adventures, plumbing the depths around icebergs and volcanoes, meeting sharks, sea turtles, seals, narwhals, whales, and many others along the way. As he shares his wondrous visions, the author also explains his approach to the photographic artistry. "My goal," he says, "is to immerse myself in an animal's world so that I can extract from those moments a new image, or a new insight into behavior heretofore unseen. I become the creature I pursue, in theory anyway . . ." This elegant book becomes a journey not only into aquatic wildlife but also into the art of photography itself. *Adobe Photoshop CC Made Easy* Most people would love to use Adobe Photoshop but find it somewhere between difficult and impossible to learn. What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book. John Stezaker is one of the most distinguished voices in the history of image-based collage. Since the 1970s Stezaker's work has occupied a unique position in the face of radical changes in the economy of popular visual culture and its implications on the value of 'found' imagery in art. Faced with the post-conceptual crisis of the mid-1970s, Stezaker came to reject the prevailing tendency among his British contemporaries towards agitprop photomontage, promoted in the name of punk, anarchism and second-wave feminism. He also positioned himself at a distance from the North American Pictures Generation artists with whom he had a meaningful exchange during this period, and in whose narrative he remains something of a missing link to this day. Stezaker was gradually to become consumed by a different enquiry altogether: one that was, and remains, invested in the possibility of reviving the mechanically reproduced image and exploring its potentials as an outmoded visual currency that is shifting out of circulation in favour of new technologies and alternative modes of image distribution.00Exhibition: Luxembourg + Co., London, UK (01.10 - 05.12.2020). In this stunning collection, Magnum photographer Harry Gruyaert explores the visual power of shorelines. The "edges" that Harry Gruyaert, a preeminent member of the Magnum photo agency, explores in this lush, full-color book are the oceans, seas, and rivers where humans meet the edge of the shoreline and the water begins. This unique volume, which opens from the bottom up, takes the reader to Israel's Dead Sea, the Niger River in Mali, the North Sea of Iceland, South Korea, and Biarritz, as Gruyaert's photos record the subtle chromatic vibrations of the edges of the far East and West. Gruyaert juxtaposes the hustle of the city with a pared-down, yet intense, nature. His landscapes are never empty; they are inhabited places where light, color, objects, people, and situations weave a serene, sublime scene. This beautifully produced photographic manifesto reveals the profoundly poetic character of Gruyaert's work, and the sensual elegance of his compositions. Offering a series of case studies of recent media controversies, this collection draws on new perspectives in cultural studies to consider a wide

variety of images. The book suggest how we might achieve a more subtle understanding of controversial images and negotiate the difficult terrain of the new media landscape.
