Mountain, mountain heights, mountain range and volcano names and their locations. Ocean, seas, marginal seas, and their locations respective to each other City, building, landmark and capital city names and location. Deserts, forests, jungles, glaciers! Country size, flags, language currency, religion, climate and population. Flag, flag colors, other flag attributes. Physical Geography jargon. World record facts regarding geography. Challenging multiple choice questions: We have seen several quiz books that have a poor selection of multiple choice questions, such as example below... What is the highest mountain in Turkey? A Mt. Whitney B Mt. Everest C Mt. Ararat D Mt. Cook Whilst this question is somewhat tricky in itself, the answers given allow most geographers to eliminate the 3 wrong answers quickly to come up with answer C. Instead of this approach, we have kept the quiz more like shown below to make this strategy of quizzing harder for the challenger... What is the highest mountain in Turkey? A Mt. Elbrus B Mt. Davamond C Mt. Ararat D Mt. Bazarduzu Although it may be easy for some seasoned geographers, this question, by the choices given is harder for the most part, and will hopefully trigger more conversation/thought before answering. The completion of this collection took many months, and, for a variety of reason, required the assistance and/or indulgence of a number of individuals. First and foremost, I would like to thank Tim Hudson for his useful input and support at the outset of the project Likewise, I would like to thank Jesse O. McKee for providing a hospitable environment during my affiliation with the University of Southern Mississippi. At Louisiana State University I am grateful to Sam Hilliard and Carville Earle for their invaluable understanding. The book became part of the GeoJournal Library as a result of Wolf Tietze's confidence in the topic, and because of Henri G. van Dorssen's (and Kluwer Academic Publishers') good nab.lre - despite numerous 'problems'. Curtis C. Roseman, and the remainder of the Geography Department at the University of Southern California (where I completed many last minute details for the volume), are to be thanked for the cordial and warm environ ment I received while a visitor in Los Angeles. Finally, no multi-authored collection reaches completion without the help of many patient contributors. This particular book suffered many set-backs along the way, so I am particularly grateful to the authors herein. They demonstrated their compassion and exceptional professionalism throughout, by never second-guessing my decisions, and by allowing me to remedy the set-backs in my own way. They were a pleasure to work with, and they should take pride in their achievements.
